upon the pioneering new media scene that Amsterdam is known for, with an emphasis on the study of Internet culture. Students gain an in-depth knowledge in new media theory, including perspectives such as software studies, political economy, and other critical traditions, and applied to such topics as social media, data cultures, and locative devices. They engage with the emerging area of digital methods, an ensemble of Internet research approaches and techniques that are specific to the new media and the study of natively digital objects. Additionally, students can choose to train in the areas of issue mapping, information visualization, digital writing and publishing, or social media research. The MA program combines a variety of teaching formats, ranging from lectures and group projects to lab sessions. Interested students are also supported in undertaking research internships. Students produce a wide portfolio of works, including theoretically engaged essays, empirical research projects, new media experiments, blog and wiki entries, in addition to organizing symposia. The program thereby enables students to contribute to timely discourses on digital culture, to conduct innovative research projects, and to critically engage in new media practices. The International MA in New Media and Digital Culture is an up-to-date digital humanities study program. Students maintain a new media issues blog, recognized as among the leading academic blogs on the subject of digital culture, where they critique and discuss books, events, and new media objects. Students also get involved in a lively new media culture, both at the university, where internationally renowned speakers present their work and collaborative research projects are developed, and beyond. Cultural institutions, such as the Waag Society, the de Balie Center for Culture and Politics, and Mediamatic regularly host inspiring events. The Institute of Network Cultures, initiators of such events as UnlikeUs, Society of the Query, MyCreativity, and Video Vortex, regularly collaborates with the program. Digital media practitioners, such as Appsterdam, various Fablabs, and hacker festivals regularly open their doors to interested audiences. Finally, students are also encouraged to participate in PICNIC, the creative industries festival. A strengthening low pressure will move from the Midwest to the Northeast on Wednesday. As it does, it will bring several inches of snow from northern Illinois to Maine. The hardest hit areas are expected to be from western New York to Maine where 1 to 2 feet of snow is possible. Moath al-Alwi is a Yemeni national who has been in US custody since 2002. He was one of the very first prisoners moved to Guantanamo, where the US military assigned him the Internment Serial Number 028. March 10, 2014* I write this letter, as I wrote my last, between bouts of violent vomiting and sharp pains in my stomach caused by this morning's force-feeding session. Reading news articles, you would think that we have stopped striking. Perhaps you might think that our protests had even been sated by government concessions. We may be trapped behind the walls of Guantanamo, but we will not be silenced. I write this letter to tell you that we are still striking. We will not stop until we get our dignity back in this place and are allowed to return home to our families. With President Barack Obama's blessing, Colonel Bogdan, the warden at Guantanamo, has instituted humiliating groin searches, especially when we are taken for phone calls with our lawyers or families. He has withheld our medical treatment and confiscated our legal papers and Qurans. The Colonel has been quoted as saying that he knows how to discipline us because he has children at home. We are not his children and this is certainly not our home. We are grown men with families who no longer know what we look like. Here, a peaceful hunger strike automatically places the prisoner on "disciplinary status", which involves being subjected to various forms of punishment. To discourage striking, the prisoner is moved from communal living to solitary confinement and is force-fed. Because I decided to peacefully protest my imprisonment here, the special mattress and medical pillows prescribed for my chronic back pain, all of my underwear, my electric razor, and even my bar of soap and toothbrush have been confiscated. I, too, am strapped down and force-fed for over an hour every single day. During the session, I am constantly vomiting the feeding solution into my lap. As I am carried back to my cell, I cannot help but vomit on

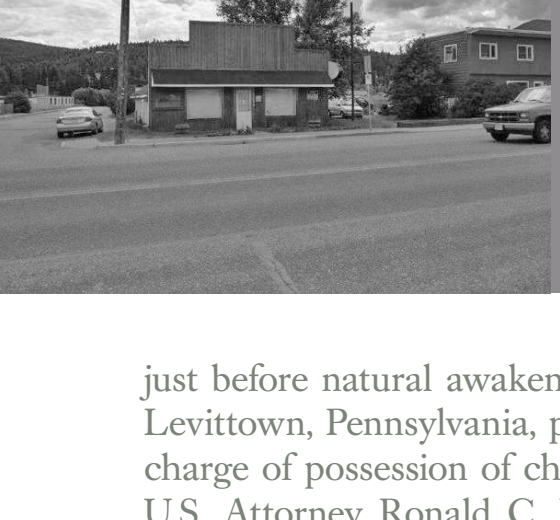

distributing child pornography, announced United States Attorney Kenneth Magidson. Willis pleaded guilty January 8, 2014. Today, Senior U.S. District Judge Janis Graham Jack took into consideration the need to protect the public and deter future criminal conduct and handed Willis a total of 120 months in federal prison. Additional information was also presented today, including the fact that in addition to his distribution of actual child pornography, Willis had posted non-pornographic images of children with whom he had contact on the web in an effort to entice other pedophiles. In handing down the sentence, Judge Jack stated that she doubted anything could be done to deter his future criminal conduct and ordered Willis to serve a lifetime of supervised release following completion of his prison term. During that time, he will have to comply to comply with numerous requirements designed to restrict his access to children and the Internet. He will also be ordered to register as a sex offender. Willis came to the attention of law enforcement after multiple pornographic images of children were posted to several websites. The investigation led to the identity of Willis who had been posting and exchanging child pornography in Corpus Christi between May and October 2012 via legitimate websites with other users who were similarly interested. Willis resided in Corpus Christi during parts of 2012 but left the area sometime during late 2012. He was eventually discovered and arrested without incident in Petersburg, Virginia, in October 2013. The ongoing investigation has linked Willis to numerous occurrences of Internet-based child pornography-related activities in multiple states. Willis will remain in custody pending transfer to a U.S. Bureau of Prisons facility to be determined in the near future. The FBI investigated with the assistance of the Corpus Christi Police Department's Internet Crimes Against Children Task Force. Good afternoon! You have the surcharges for taxes. The prove is in the attachment. You gotta revise it before July 13th 2014. Your identification number: CBX/24766. Differently you'll take court claim. Yours very truly, Chief of Police precinct #118. secrete serotonin. This level is also referred to as paradoxical sleep because the sleeper, although exhibiting EEG waves similar to a waking state, is harder to arouse than at any other sleep stage. Vital signs indicate arousal and oxygen consumption by the brain is higher than when the sleeper is awake.

An adult reaches REM approximately every 90 minutes, with the latter half of sleep being more dominated by this stage. REM sleep occurs as a person returns to stage 1 from a deep sleep. The function of REM sleep is uncertain but a lack of it will impair the ability to learn complex tasks. One approach to understanding the role of sleep is to study the deprivation of it. During this period, the EEG pattern returns to high frequency waves which look similar to the waves produced while the person is awake 30 seconds of deep (stage N3) sleep. A screenshot of a PSG of a person in REM sleep. Eye movements highlighted by red box. Sleep proceeds in cycles of REM and NREM, usually four or five of them per night, the order normally being N1 -- N2 -- N3 -- N2 -- REM. There is a greater amount of deep sleep (stage N3) earlier in the night, while the proportion of REM sleep increases in the two cycles just before natural awakening.

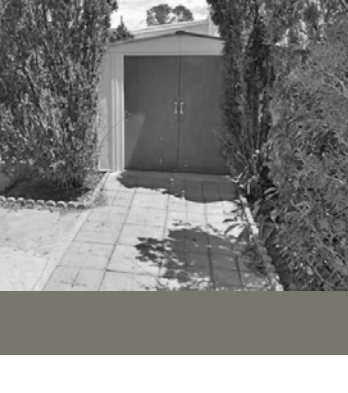

Vincent Petaccio, 60, of Levittown, Pennsylvania, pled guilty today to a federal charge of possession of child pornography, announced U.S. Attorney Ronald C. Machen, Jr.; Valerie Parlave, Assistant Director in Charge of the FBI's Washington Field Office; and Cathy L. Lanier, Chief of the Metropolitan Police Department (MPD). Petaccio entered the guilty plea in the U.S. District Court for the District of Columbia. The Honorable Rudolph Contreras is to sentence him on June 18, 2014. Petaccio faces a maximum sentence of 20 years of imprisonment and a \$250,000 fine. According to the government's evidence, on April 12, 2013, Petaccio contacted an undercover officer with the FBI's Child Exploitation Task Force, who had posted an ad on a social networking site. Over the course of two days, Petaccio engaged in instant message conversations with officer, whom he believed was the father of an under-aged girl. During their communications, Petaccio sent the

undercover officer 59 still images and 10 videos of graphic child pornography. Pursuant to a search of Petaccio's home at the time of his arrest, law enforcement recovered approximately 150 still images and 10 videos of child pornography on his computer. Hello Dear, How are you? I have been in search of someone to introduce this transfer investment to and it is my pleasure to seek for your business assistance. In the year 2007, One Late Dr. Curtis, had a fixed deposit with my bank for 36 calendar months, valued Eight million, four hundred thousand US dollars only (USD8,400,000.00) the due date for this deposit contract was 11 December, 2010. Sadly, Dr. Curtis was in Libya on a business trip and that was how he met his end, I have carried out various inquiries to locate any of his client and extended relatives but this has proved unsuccessful. Since the demise of this our customer, who was a seasoned oil Merchant/contractor. I have kept a close watch of the deposit records and accounts and since then no body has come to claim the said money as next of kin. I hereby write in regards to this effect to have you stand as the

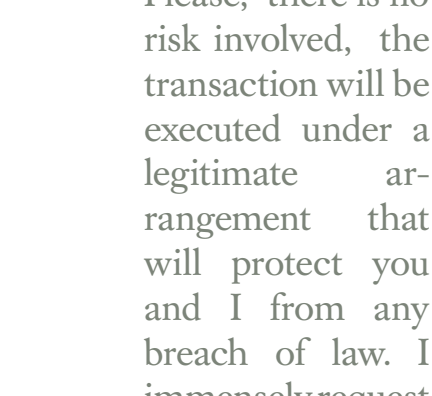

rightful beneficiary to Late Dr. Curtis so that the fund will be claimed and transferred into your designated bank account before my bank declare the total fund unserviceable and confiscate it. Because last week my Bank Management requested that I should give instructions on what to do about his funds. Please, there is no risk involved, the transaction will be executed under a legitimate arrangement that will protect you and I from any breach of law. I immensely request for your optimum honesty cooperation and let me know your mind on this, and please do handle this information with utmost secrecy. We shall go over the details once I receive your urgent response, through my private email:geraldmag1@gmail.com Anticipating your communication and God bless you. Best regards, Gerald Magoro. Agricultural Development Bank, Ghana Limited Yesterday my husband saw our resident ring-necked pheasant walking through our yard, over to our neighbor's house and up on their front steps, before disappearing down the alley that runs behind our houses.

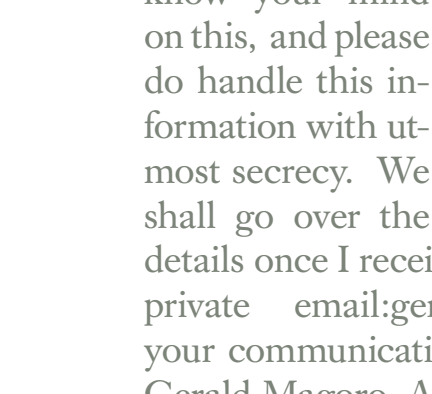

We live off River Road in Milwaukie, not far from the Willamette. I hear the pheasant call often when I have my windows open. I grew up in Aloha, Oregon, when it was much more rural than now. We frequently had pheasants that visited our field and yard and I am so familiar with that call. Very nostalgic to me! In our inspirational thematic residency programs, artists, curators, and other arts professionals come together to focus on a specific theme. Through peer interaction, discussion groups, studio work, formal lectures, and studio visits from world-renowned visiting artists and curators, participants gain new ideas and insights that can be applied to creative exploration and the development of their work. The severe weather threat will shift east on Friday, extending from the Gulf Coast northward to the Upper Ohio Valley. The main threat will be thunderstorms with damaging straight-line winds and hail. Heavy precipitation is possible throughout the severe weather threat area, as well as in the Northeast. Recent heavy rainfall in the South has brought rises to numerous rivers and creeks. The rain will taper off by Tuesday, but it will take some time for water levels to recede. Meanwhile, rainfall combined with snowmelt in the Northeast will raise river levels there through midweek. Tag The sixth day of my walk along the Izumo 33 Kannon Pilgrimage route was as glorious as the previous few days. Like the last 2 days my route lay roughly east through the mountains. The spine of western japan is the Chugoku Mountains, and here on the northern side the rivers run mostly north towards the sea, so my easterly route involved a lot of up and down. The last 2 days I had been. Pression became fixed in his mind that the Assistant in charge of the _Remove_ was a source of trouble. XXIV Sunday was a day of cheerfulindolence, devoted to attending the services in the Chapel, which was filled with the scent of incense all day long. At Vespers, while the clear, boyish voices intoned the long-drawn canticles, Jean would be gazing at some woman's face half seen in the dusk of the galleries where the pupils' mothers and sisters knelt

during the office, their haughty air contradicting the humble attitude. At the sound of the _Ave maris stella_, the lowly bookbinder's son would lift his eyes to these ladies of high degree, the plainest of whom feels herself a jewel of price and cherishes a natural and unaffected pride of birth. The chants and incense, the flowers and sacred images, whatever troubles the imagination and stimulates to prayer, all these things united to enervate his spirit and deliver him a trembling victim to the glamour of these patrician dames. But it was Gabrielle he worshipped in them, Gabrielle to whom he offered up his prayers, his supplications. All that element in religion which gives to love the fascination of forbidden fruit appealed powerfully to his imagination. Unbeliever though he was, he loved the Magdalen's God and savoured the creed that has bestowed on lovers one amorous bliss the more--the bliss of losing their immortal souls. XXV Little by little the boys wearied of this insubordination,

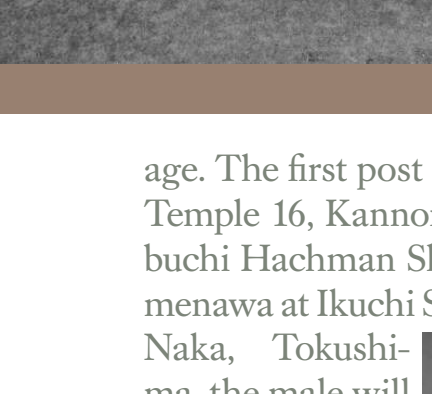

their imaginations proving unequal to the invention of any new forms of mischief. Even de Grizolles himself left off shooting beans. Instead, he conceived the notion of brewing chocolate inside his desk with a spirit-lamp and a silver patty-pan. Jean left him in peace and re-opened his Sophocles with a sigh of relief. But the Superintendent, going by in the court, caught a smell of cooking, searched the desks and unearthed the patty-pan, which he offered, still warm, for the Reverend the Director's inspection, with the words: "There! that's what goes on in Monsieur Servien's class-room." The Director slapped his forehead, declared they would be the death of him and ordered the patty-pan to be restored to its owner. FROM MR JAMES EDWARD Lagos-Nigeria. Tag The sixth day of my walk along the Izumo 33 Kannon Pilgrimage route was as glorious as the previous few days. Like the last 2 days my route lay roughly east through the mountains. The spine of western japan is the Chugoku Mountains, and here on the northern side the rivers run mostly north towards the sea, so my easterly route involved a lot of up and down. The last 2 days I had been. Pression became fixed in his mind that the Assistant in charge of the _Remove_ was a source of trouble. XXIV Sunday was a day of cheerfulindolence, devoted to attending the services in the Chapel, which was filled with the scent of incense all day long. At Vespers, while the clear, boyish voices intoned the long-drawn canticles, Jean would be gazing at some woman's face half seen in the dusk of the galleries where the pupils' mothers and sisters knelt

during the office, their haughty air contradicting the humble attitude. As a concerned citizen interested in helping Debbie successfully transition into life outside prison, I am writing to ask that you please parole her at this hearing. She has served over 35 years of a 30-100 year sentence for third-degree murder, even though the average sentence for that charge is 10-15 years. She is still in prison years after her minimum sentence, despite

Like so many of the temples on this pilgrimage, Rengeji has great views over the inner Izumo area. The Kannon sculpture that is the honzon is dated to the mid eighth century so that suggest the temple will date from that time too. Now it belongs to the Soto Zen sect, but earlier it was a Tendai temple.

There is a spring behind the temple that legend says has healing powers. Tropical Cyclones are dangerous because they produce destructive winds, heavy rainfall with flooding and damaging storm surges that can cause inundation of low-lying coastal areas. Cyclones have wind gusts in excess of 90 km/h around their centres and, in the most severe

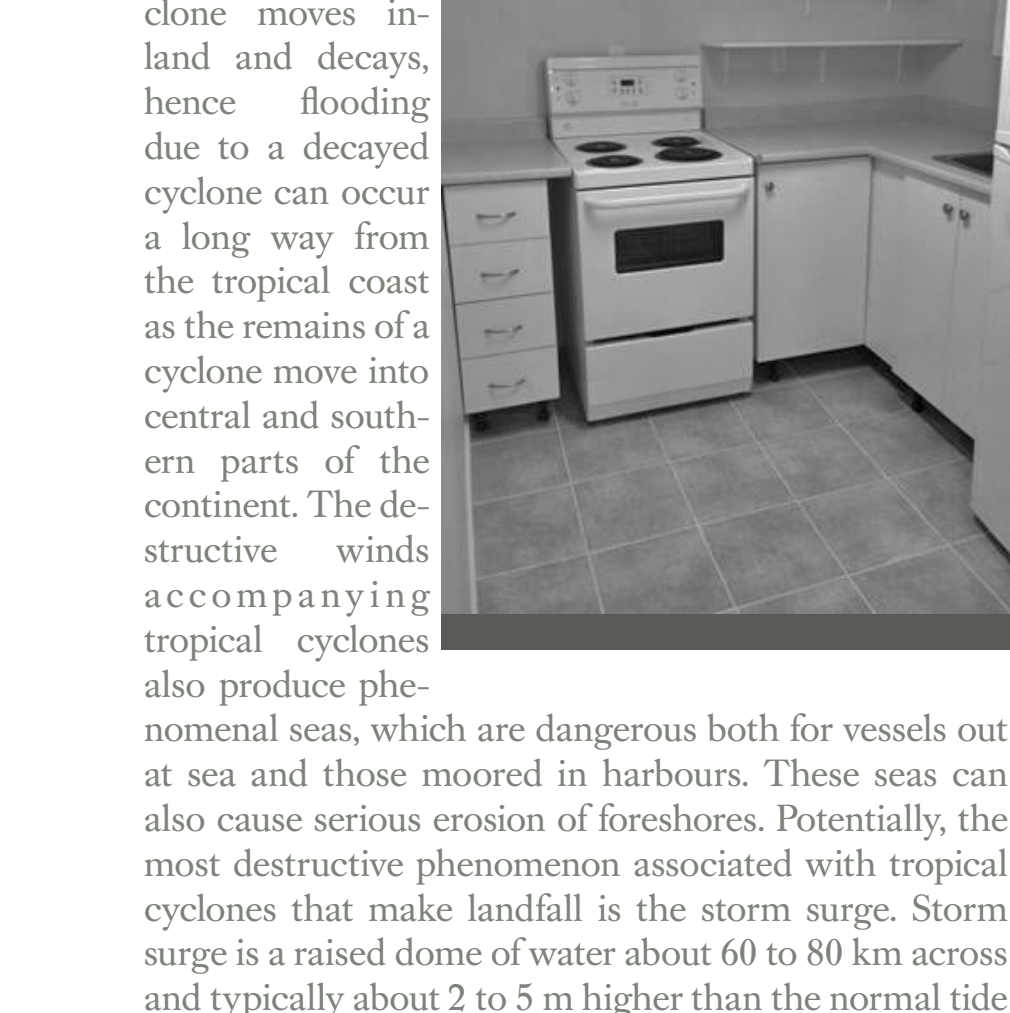

cyclones, gusts can exceed 280 km/h. These very destructive winds can cause extensive property damage and turn airborne debris into potentially lethal missiles. It is important to remember that,

during the passage of the cyclone centre or eye, there will be a temporary lull in the wind, but that this will soon be replaced by destructive winds from another direction.

Heavy rainfall associated with the passage of a tropical cyclone can produce extensive flooding. This can cause further damage and death by drowning. The heavy rain can persist as the cyclone moves inland and decays, hence flooding due to a decayed cyclone can occur a long way from the tropical coast as the remains of a cyclone move into central and southern parts of the continent. The destructive winds accompanying tropical cyclones also produce phenomenal seas, which are dangerous both for vessels out at sea and those moored in harbours. These seas can also cause serious erosion of foreshores. Potentially, the most destructive phenomenon associated with tropical cyclones that make landfall is the storm surge. Storm surge is a raised dome of water about 60 to 80 km across and typically about 2 to 5 m higher than the normal tide level. If the surge occurs at the same time as a high tide

then the area inundated can be quite extensive, particularly along low-lying coastlines. feels good to hear back from you again i guess you aren't just a keyboard warrior lol :) Lots of guys on craigslist are nothing but talk it seems....they probably all live at home with their parents lol. so when you wanna meet up? I have no plans we can do this whenever you want even right now cause Im just watching episodes of that show breaking bad.... love this show its so crazy. At first I really was kinda worried about posting on craigslist cause I had a scary experience a year ago meeting someone from personals

(I had to call for help he was crazy) so just to be on the safe side I'd like you to do a quick verify on this page: <http://safer-daters.com/katiepage> They protect members and keep out offenders and people with felonies....it

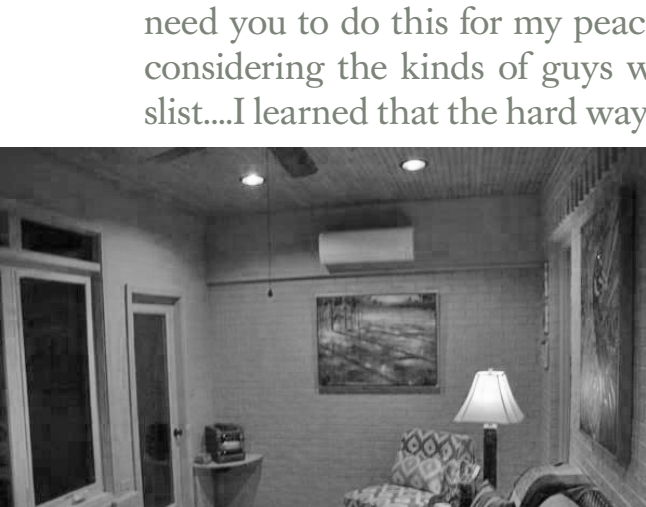

does cost a dollar but thats it for the verification as long as you're not in their database you're getting my number and calling me tonight. Have you seen this before? Its been featured on the news many times. :) I just need you to do this for my peace of mind the first time considering the kinds of guys who might be on craigslist....I learned that the hard way. I'm gonna wait for you

to call or text... you'll have to use the link above to get it - thats all I need to know you can be trusted. I really hope you aren't just talkand followthrough cause I've been excited about trying out a friend with benefits. Just keep it real with me and don't get clingy

Most of the land in question is pristine tropical forest containing extremely high levels of biological diversity.

From North-South Time: 08:10 PM I recently purchased a new keel cable from International Marine. I was expecting a replacement steel cable but instead received a braided grey cord (material unknown). I have two questions: 1.

Is this the correct replacement for the steel cable? I don't want to fit it and then have the keel come crashing down. ** update: I understand this is AmSteel, so I assume this is OK ** 2.

Does anyone have any tips on replacing the keel cable? Should I do it with the keel down (which would seem prudent) ? How is the cable end affixed to the winch? Any tips from someone who has done this before (preferably with this AmSteel) would be very much appreciated. into your bank account in your country.I am the manager of Barclays Bank of Ghana Ltd in (Tema branch) a family man and a man of peace. I discovered this money Five million, Five hundred and Forty thousand united state dollars (USD\$5,540,000.00) On the course of last year ending 2013 business financial report as the excess

profit made in my branch office. I had already submitted an approved end of the year financial report to my head office here in capital city Accra and they will never know of this excess and I have placed this amount on an Escrow Call Account without a beneficiary. As an officer of this bank I cannot be directly connected to this money and all I need from you is to stand claim as the original depositor of these funds who made the deposit in my branch. Upon your response, I will configure your names/information on our database as holder of the Escrow Call Account. I will then guide you on how to apply to my head office for the Account Closure/ bank-to-bank remittance of the funds to your designated bank account.I will give you further details upon your acceptance of this proposal.I also intend that you shall retain 35% of the total funds as your commission. Thanks for your assistance, Sincerely Yours, Mr. James Kojo. John Whitehead of the Rutherford Institute, a civil liberties organization based in Charlottesville, Va., says, "Thanks to an insidious partnership between Google and the National Security Agency (NSA) that grows more invasive and more subtle with every passing day, "we the people" have become little more than data consumer commodities to be bought, sold and paid for over and over again."

Whitehead warns, "With every smartphone we buy, every GPS device we install, every Twitter, Facebook, and Google account we open, every frequent buyer card we use for purchases--whether at the grocer's, the yogurt shop, the airlines or the department store, and every credit and debit card we use to pay for our transactions, we're helping Corporate America build a dossier for its government counterparts on who we know, what we think, how we spend our money, and how we spend our time. With rivers already high, the ground already soaked and more way on the way for the region expect the risk of flooding to continue through the rest of the week. Along with the weakening of the low the North East monsoon will be subsiding through the mid-week. With the pressure gradient becoming less steep as the low starts to fill the winds will respond by slowing down. Thus the gale force winds and high waves up and down Luzon and Visayas will start to subside by Wednesday. Until then though rip currents and foul surf will continue to be a problem. I would highly recommend

staying out of the water until conditions become safe. California has been the source of much innovation, from agribusiness and oil to fashion and the digital world. Historically much richer than the rest of the country, it was also the birthplace, along with Levittown, of the mass-produced suburb, freeways, much of our modern entrepreneurial culture, and of course mass entertainment. For most of a century, for both better and worse, California has defined progress, not only for America but for the world. As late as the 80s, California was democratic in the fundamental sense, a place for outsiders and, increasingly, immigrants: roughly 60 percent of the population was considered middle class. Now, instead of a land of opportunity, California has become increasingly feudal. According to recent census estimates, the state suffers some of the highest levels of inequality in the country. By some estimates, the state's level of inequality compares with that of such global models as the Dominican Republic, Gambia, and the Republic of the Congo. At the same time, the Golden State now suffers the highest level of poverty in the country: 23.5 percent compared to 16 percent nationally^worse than long-term hard luck cases like Mississippi. It is also now home to roughly one-third of the nation's welfare recipients, almost three times its proportion of the nation's population. Like medieval serfs, increasing numbers of Californians are downwardly mobile, and doing worse than their parents: native born Latinos actually have shorter lifespans than their parents, according to one recent report. Nor are things expected to get better any time soon. According to a recent Hoover Institution survey, most Californians expect their incomes to stagnate in the coming six months, a sense widely shared among the young, whites, Latinos, females, and the less educated. Some of these trends can be found nationwide, but they have become pronounced and are metastasizing more quickly in the Golden State. As late as the 80s, the state was about as egalitarian as the rest of the country. Now, for the first time in decades, the middle class is a minority, according to the Public Policy Institute of California.

Thanks for your assistance, Sincerely Yours, Mr. James Kojo. John Whitehead of the Rutherford Institute, a civil liberties organization based in Charlottesville, Va., says, "Thanks to an insidious partnership between Google and the National Security Agency (NSA) that grows more invasive and more subtle with every passing day, "we the people" have become little more than data consumer commodities to be bought, sold and paid for over and over again."

Whitehead warns, "With every smartphone we buy, every GPS device we install, every Twitter, Facebook, and Google account we open, every frequent buyer card we use for purchases--whether at the grocer's, the yogurt shop, the airlines or the department store, and every credit and debit card we use to pay for our transactions, we're helping Corporate America build a dossier for its government counterparts on who we know, what we think, how we spend our money, and how we spend our time. With rivers already high, the ground already soaked and more way on the way for the region expect the risk of flooding to continue through the rest of the week. Along with the weakening of the low the North East monsoon will be subsiding through the mid-week. With the pressure gradient becoming less steep as the low starts to fill the winds will respond by slowing down. Thus the gale force winds and high waves up and down Luzon and Visayas will start to subside by Wednesday. Until then though rip currents and foul surf will continue to be a problem. I would highly recommend

staying out of the water until conditions become safe. California has been the source of much innovation, from agribusiness and oil to fashion and the digital world. Historically much richer than the rest of the country, it was also the birthplace, along with Levittown, of the mass-produced suburb, freeways, much of our modern entrepreneurial culture, and of course mass entertainment. For most of a century, for both better and worse, California has defined progress, not only for America but for the world. As late as the 80s, California was democratic in the fundamental sense, a place for outsiders and, increasingly, immigrants: roughly 60 percent of the population was considered middle class. Now, instead of a land of opportunity, California has become increasingly feudal. According to recent census estimates, the state suffers some of the highest levels of inequality in the country. By some estimates, the state's level of inequality compares with that of such global models as the Dominican Republic, Gambia, and the Republic of the Congo. At the same time, the Golden State now suffers the highest level of poverty in the country: 23.5 percent compared to 16 percent nationally^worse than long-term hard luck cases like Mississippi. It is also now home to roughly one-third of the nation's welfare recipients, almost three times its proportion of the nation's population. Like medieval serfs, increasing numbers of Californians are downwardly mobile, and doing worse than their parents: native born Latinos actually have shorter lifespans than their parents, according to one recent report. Nor are things expected to get better any time soon. According to a recent Hoover Institution survey, most Californians expect their incomes to stagnate in the coming six months, a sense widely shared among the young, whites, Latinos, females, and the less educated. Some of these trends can be found nationwide, but they have become pronounced and are metastasizing more quickly in the Golden State. As late as the 80s, the state was about as egalitarian as the rest of the country. Now, for the first time in decades, the middle class is a minority, according to the Public Policy Institute of California.

This week, from 22 to 25 January the Davos forum will take place in Switzerland. Many of the wealthiest businessmen and top executives of the World's largest multinationals will be sharing conversations with more than 40 heads of state and government, representatives of multilateral organizations, scholars, leaders of a bunch of NGOs and a few union representatives. Also in Davos, there will be over 800 journalists from all over the world. The most important group of businessmen and top executives of Davos are + / -1,000 representing 0.00001 % of the worlds population but handle most of the wealth, a high percentage of the economies and natural resources in all continents. From North-South Time: 08:10 PM I recently purchased a new keel cable from International Marine. I was expecting a replacement steel cable but instead received a braided grey cord (material unknown). I have two questions: 1.

Is this the correct replacement for the steel cable? I don't want to fit it and then have the keel come crashing down. ** update: I understand this is AmSteel, so I assume this is OK ** 2.

Does anyone have any tips on replacing the keel cable? Should I do it with the keel down (which would seem prudent) ? How is the cable end affixed to the winch? Any tips from someone who has done this before (preferably with this AmSteel) would be very much appreciated. 1026167 with registered office at 1 Churchill Place, London E14 5HP. The 20th century witnessed new terrains on which crime and deviance were encountered and understood by state and citizen. Imperial expansion and decline, warfare, accelerated urbanization and suburbanization, gendered shifts

in work practices, new cultural media such as film and television, and more psychologically-informed types of marketing and advertising, created new conditions for both the perpetration and evocation of crime. Popular and official attitudes towards those termed ^deviant^ were in a constant

state of flux as the state, media, and market competed to shape dominant moral values and behaviours. Perceptions of crime^s effect on society and the lives of individuals in this period were orientated as much around practices of consumption and imaginative fulfilment, as direct experiences with criminals, the police, and judiciary systems. Prevailing forms of domestic and imperial citizenship, cities and homes, and expectations of everyday life were shaped by fear of victimization, even as contemporaries also

Founded in 1987, the Prix Ars Electronica is the oldest and most renowned award honoring excellence in media art. To keep up with developments in this fast-moving field, a few changes have once again been made. Last year, we topped 4,000 entries for the first time, noted Ars Electronica Artistic Director Gerfried Stocker. This is a truly impressive figure, one we're very proud of, but it has also made us cognizant of the fact that we have reached the limits of our capacity! After all, each of these 4,000 projects has to be given the attention it deserves-assessed, critiqued, discussed and, finally, for some, honored. In order to continue to give every submitted work all the attention it deserves, we have decided to stage four categories on a biennial basis in the future. Establishing priorities and concentrating our efforts in this way makes for a more efficient organization, assures the continued high quality of the judging and selection process, and gives greater attention and visibility to the prizewinning works. The

Prix Ars Electronica is also launching a new category that focuses on the personalities whose artistic creativity and experimentation are closely connected to the exciting early years of media culture. Such outstanding pioneers will be awarded a Golden Nica for Visionary Pioneers of Media Art. 1 februari aer det aentligen dags foer arets foersta klubbtilfalle. The wrenching story started with a pregnant woman found unconscious on her kitchen floor. In the more than eight weeks since then, lying supine in a hospital bed, the 33-year-old became the focus of an intense, emotional debate about who is alive, who is dead, and how the presence of a fetus possibly changes the equation. Last month, the ruling Japanese coalition parties quickly rammed through Parliament a state secrets law. The Americans better take notice. Under its provisions the government alone decides what are state secrets and any civil servants who divulge any "secrets" can be jailed for up to 10 years. Journalists caught in the web of this vaguely defined law can be jailed for up to 5 years. Government officials have been upset at the constant disclosures of their laxity by regulatory officials before and after the Fukushima nuclear power disaster in 2011, operated by Tokyo Electric Power Company (TEPCO). Week after week, reports appear in the press revealing the seriousness of the contaminated water flow, the inaccessible radioactive material deep inside these reactors and the need to stop these leaking sites from further poisoning the land, food and ocean. Officials now estimate that it could take up to 40 years to clean up and decommission the reactors. Other factors are also feeding this sure sign of a democratic setback. from south-central Texas to the Carolinas. In his essay, "Building, Dwelling, Thinking", Heidegger considers the interrelationships between care and design by arguing that we are only capable of building well when we know how to dwell, that is, cultivating attachments to our environments and, through this cultivation, giving and receiving care. Recent work in areas such as urban and cultural geographies, and science and technology studies, has further elaborated on this connection between care and design by exploring the affective and relational work that goes into shaping and repairing the fragile attachments between the human and non-human materials that compose the urban world. At the same time, the materiality of urban environments is often found to be inattentive to human difference and diversity, and rarely shaped by, or exposed to, a caring design ethic. Digital Analogy will allow us to examine closely the formal structures of these works and also aims to generate dialogue concerning the researches that these theories have arisen. In this exhibition the innovation comes from philosophical interpretations of technology and programming codes are seeing as poetical resources rather than being seen only as practical tools; which in the contemporary world are part of the most advanced forms

new condition. Is there a place on this site to post it? It's in NC, and I'm asking \$15K. I have all the bells and whistles, including a full cover. Last year Gates increased his wealth by \$15.8bn and has now once again become the world's richest man, worth about \$78.5bn. He's not alone - as a whole the world's millionaires got 11% richer last year. For the rest of us, the decades-long trend of stagnating income continues. In some countries - Greece, Spain and Britain - median household income fell sharply. If you are in Japan and specifically Tokyo on Monday you probably are enjoying the spring like weather that has engulfed the region following persistent southerly sub-tropical winds over the weekend. Unfortunately the little respite from the cold will be short lived as Tuesday is set to usher in blast of cold air out of Siberia. This along with a trough of low pressure developing over Japan will usher in the threat of snowfall in the Tokyo / Kanto area started Tuesday late morning through the evening hours. For the most part the weather will remain a wintry mix until evening. By that time the mercury could drop low enough to allow accumulative snowfall in parts of the Kanto Plain. How much snow fall will occur will depend on though how fast the cold surge from the NW makes it in to Tokyo. The faster the cold air flows in to the more time the atmosphere has to respond and bring heavy snowfall. Marketing art can be a huge challenge. How do you get your art in front of people who will not only love it, but want to buy it as well? Should you invest in magazine ads? Participate in art festivals? Show your work in a local gallery? All valid tactics you should be pursuing, but you may be overlooking your best marketing opportunity: Selling to collectors who have purchased your work in the past. This seems like an obvious suggestion - after all, past buyers clearly like your work and have explicitly told you they are qualified to purchase(nothing says "I can buy" like pulling out the credit card and buying). Yet I find that many artists and galleries are not putting their full efforts into marketing to past purchasers. If you aren't actively pursuing sales with past collectors you are neglecting your best pool of potential buyers. If you are in Japan and specifically Tokyo on Monday you probably are enjoying the spring like weather that has engulfed the region following persistent southerly sub-tropical winds over the weekend. Unfortunately the little respite from the cold will be short lived as Tuesday is set to usher in blast of cold air out of Siberia. This along with a trough of low pressure developing over Japan will usher in the threat of snowfall in the Tokyo / Kanto area started Tuesday late morning through the evening hours. For the most part the weather will remain a wintry mix until evening. By that time the mercury could drop low enough to allow accumulative snowfall in parts of the Kanto Plain. How much snow fall will occur will depend on though how fast the cold surge from the NW makes it in to Tokyo. The faster the cold air flows in to the more time the atmosphere has to respond and bring heavy snowfall. Marketing art can be a huge challenge. How do you get your art in front of people who will not only love it, but want to buy it as well? Should you invest in magazine ads? Participate in art festivals? Show your work in a local gallery? All valid tactics you should be pursuing, but you may be overlooking your best marketing opportunity: Selling to collectors who have purchased your work in the past. This seems like an obvious suggestion - after all, past buyers clearly like your work and have explicitly told you they are qualified to purchase(nothing says "I can buy" like pulling out the credit card and buying). Yet I find that many artists and galleries are not putting their full efforts into marketing to past purchasers. If you aren't actively pursuing sales with past collectors you are neglecting your best pool of potential buyers. advances in computation continue to enable new possibilities and new affordances for visualization and sonification that are especially relevant to studies of musicality across media. In these contexts, historical uses of musical or sonic instrumentality for affective transformations, whether positive

(as in “music therapy”) or destructive (i.e., in theaters of war or in interrogation practices) make clear a broader set of problems around ethical uses of musical media and media effects more generally. Archaeologists working on the eastern coast of England have found a series of footprints that were made by human ancestors sometime between 780,000 and one million years ago. With fewer good jobs, rising costs, and a disappearing safety net, housing, something we used to take for granted, has become, for many people, unaffordable. A fortunate few can bunk in with relatives, at least for a while. But most of us must sleep in our cars, or pitch a tent, or go to a shelter, or hit the streets. Often, we try several of these options in succession, as our resources dwindle and run out. We keep hanging in there, looking for a real job, searching for solutions, and praying for a miracle. Sometimes things get better, but often they do not. With no roof above us, no walls around us, and no locked door between us and the wide world, we are vulnerable to the weather, to illness, and to violence. Greetings from Syria, My name is Miss. Zahrah Sargon, writing from Damascus, Syria, i am 31 years old, i and my sister have plans to relocate to your country, i wish to relocate family investment project to your country also, i live with my younger sister, we lost our parents and elder brother in ongoing crisis in Syria. We have a huge capital to invest and settle down in your peaceful country, here in Syria, there is fire on the mountain, we will need a foreign partner as we don’t have account outside Syria, we will communicate more when i hear from you. Best Regards Miss. Zahrah Sargon, A strengthening area of low pressure will move up the East Coast on Thursday bringing with it significant winter weather from the Southeast to New England. Ice Storm Warnings and/or Winter Storm Warnings are currently in effect for several states. In these areas, road conditions will be dangerous.

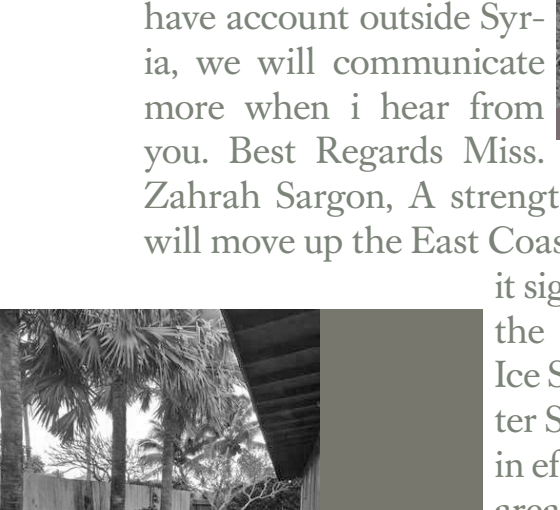

It is only really possible to understand the events that took place in Toronto in the context of the global movement against neoliberalism and the corporatization of the planet. It is my belief that this movement is best explained as an individual and collective response to various forms of domination and exploitation. My politics are inseparable from my own life experiences, which I would like to briefly speak about now. When I was in college trying to get rich and focusing on my own personal comforts seemed right when everyone else was chasing the same thing. However, two events occurred during this time that fundamentally changed the way I now see the world. The first event was the global financial crisis of 2008. The second event took place in December, 2008, when Israel launched an invasion into the Gaza Strip. This led me to see more and more about the world that I could not unsee, including how the continued exploitation of the environment is connected to the same economic interests mentioned above. Financial crises, war and environmental degradation share a common thread. They are born of the prevailing economic system, which is only interested in maximizing profit and increasing growth. This system is predicated on maintaining vast levels of inequality, where a small number of people have incredible amounts of wealth while the masses are locked in

poverty. shiny fuji apples, five nice avocados, no-salt-top crackers, pomogranate juice, butter, good eggs, potting soil (for the other little trees), nuts/fruit for the banana bread (in the oven), two bags xochitl no-salt chips (on sale! got the last two), bought the digital picture frame again (down to 50% off): you were right, it needed a MS-DOS formatted card... We live in what the German political scientist Ernst Fraenkel called “the dual state.” Totalitarian states are always dual states. In the dual state civil liberties are abolished in the name of national security. The political sphere becomes a vacuum “as far as the law is concerned,” Fraenkel wrote. There is no legal check on power. Official bodies operate with impunity outside the law. In the dual state the government can convict citizens on secret evidence in secret courts. It can strip citizens of due process and detain, torture or assassinate them, serving as judge, jury and executioner. It rules according to its own arbitrary whims and prerogatives. The outward forms of democratic participation: voting, competing political parties, judicial oversight and legislation are hollow, political stagecraft. Fraenkel called those who wield this unchecked power over the citizenry “the prerogative state.” U.S. Oil Sands’ water-and-energy-intensive extraction process involves first digging up congealed tar sands, then crushing them to reduce their size. The company then mixes the crushed sand with large amounts of hot water (at a temperature of 122-176F) to loosen up and liquefy the tarry, oil-containing residue and separating it from the sand. Next, coarse solids sink, are subsequently removed and considered waste tailings. Air is then bubbled through the remaining water-oil mixture, which makes the oil float to the top in what’s referred to as “bitumen froth,” in industry lingo. The froth is then dewatered, meaning all the air molecules are removed. When it finally gets to this point in the production process, the mixture is still so thick it can’t be pumped through pipelines. Court bailiff, GOMEZ CHAPMAN “I must confess that over the last few years I have been gravely disappointed with the white moderate. I have almost reached the regrettable conclusion that the Negro’s great stumbling

block in the stride toward freedom is not the White Citizen’s Councillor or the Ku Klux Klaner, but the white moderate who is more devoted to “order” than to justice; who prefers a negative peace which is the absence of tension to a positive peace which is the presence of justice; who constantly says “I agree with you in the goal you seek, but I can’t agree with your methods of direct action;” who paternalistically feels he can set the timetable for another man’s freedom; who lives by the myth of time and who constantly advises the Negro to wait until a “more convenient season.” Shallow understanding from people of goodwill is more frustrating than absolute misunderstanding from people of ill will. Lukewarm acceptance is much more bewildering than outright rejection.”

The Belgian artist Michal Borremans (born in 1963, Geraardsbergen) made his international breakthrough in the late 1990s and has since participated in various group and solo exhibitions in Belgium and abroad. In 2014, BOZAR, in collaboration with the Dallas Museum of Art, presents a much anticipated retrospective of his work in his home country. Michal Borremans. As sweet as it gets gives an overview of his varied body of work from 1990 to the present, with an impressive selection of about 50 paintings, 40 drawings, and 5 films. The exhibition lays bare the mutual relations between these various art forms and takes visitors on a journey into

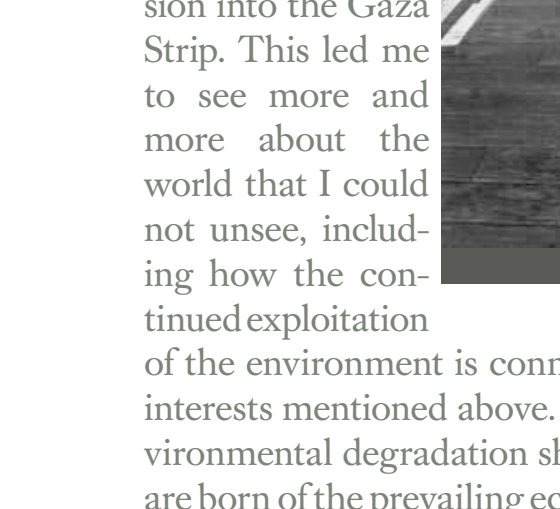

the artist’s mysterious and hallucinatory visual world. There is a certain dimension to Borremans’s works which are teeming with symbols and references to historic paintings. His work constitutes a subtle subversion. Notice of eviction, This notice is to inform you that your home has been foreclosed on by the bank and you need to move out until March 25, 2014. Only recently, however, have scholars begun to use methods from affective science to test whether emotion regulation strategies can be used to influence conflict-related emotions in a way that would facilitate conflict resolution. To provide the context for this work, we begin by considering the roles emotions play in intractable conflicts. Next, we discuss how emotion regulation might be relevant to intractable conflicts, with a particular focus on cognitive reappraisal. We then review recent studies, conducted mainly in the context of the Middle East conflict, which suggest that cognitive reappraisal may be able to reduce negative emotions and promote public support for peaceful policies. We conclude by describing future challenges and opportunities for research in this area. Attention, YOUR TRUST AND PARTNERSHIP. to see the country," will usually make your time in immigration even longer. Immigration officials don't seem to believe that people would come to the country just to explore and the most easily accepted answers seem to be "to surf" or "to visit family". Make your life easier and go with one of these! Make sure you ask for the full 90 days, as sometimes officials have been known to arbitrarily pick a number, and check your visa before you leave immigration. If you enter by land, you will still need to check-in at immigration, but since you will have recieved a visa in Guate, Honduras or Nica

already, you won't need to pay a fee. They will probably stamp your passport though and enter your details in the computer, so make sure you stop. El Salvador has really cracked down on corruption at the immigration level and chances are you won't be asked to pay a "fee". If you are, ask for the officer's name and ID number and tell them you're going to call the anti-corruption number that is usually posted on the wall of the immigration offices. You won't be this lucky in any of our neighboring countries, unfortunately! The intent of play or malice is camouflaged in scenes of the masked figures in abstracted wastelands. By navigating these pure, yet contaminated misty passages, one embarks in a search for what makes us savage, wild, or 'other'. It is an investigation into how people present themselves vs. who they really are: it is a pursuit for finding what makes us human and what makes us un-human in a contemporary time. An automated reader attached to the spotter car takes a picture of every license plate it passes and sends it to a company in Texas that already has more than 1.8 billion plate scans from vehicles across the country. These scans mean big money for Sousa -- typically \$200 to \$400 every time the spotter finds a vehicle that's stolen or in default -- so he runs his spotter around the clock, typically adding 8,000 plate scans to the database in Texas each day. "Honestly, we've found random apartment complexes and shopping plazas that

are sweet spots" where the company can impound multiple vehicles, explains Sousa, the president of New England Associates Inc. in Bridgewater. But the most significant impact of Sousa's business is far bigger than locating cars whose owners have defaulted on loans: It is the growing database of snapshots showing where Americans were at specific times, information that everyone from private detectives to insurers are willing to pay for. Christopher M. Horton, 21, of Highland, Illinois, was sentenced today in the U.S. District Court to 90 years in prison for six counts of production of child pornography, the United States Attorney for the Southern District of Illinois, Stephen R. Wigginton, announced. Horton was also ordered to pay \$3,250 in restitution to the victims of his offenses and a \$600 special assessment. If he is ever released from prison, he will be on federal supervised release for the remainder of his life. "While there is little comfort for the instant victims, it is assuring to know that such a vicious predator will never again walk free in Southern Illinois," said United States Attorney Wigginton. Employed as a martial arts instructor at a studio in Belleville, Illinois, Horton sexually abused three students, ages 6, 6, and 10 years, and video recorded these acts of abuse using his cell phone. Horton also attempted to engage a fourth minor, who was 7 years old, in sexually explicit conduct to produce a recording of that conduct. Approximately 57 video files containing child pornography were recovered from Horton's cellular phone, which were created by Horton between the dates of May 1, 2012, and February 9, 2013. During an interview with law enforcement, Horton confessed to sexually abusing the minors and to having produced video recordings of the abuse. In all, evidence showed that Horton preyed upon children whenever given the opportunity, including at the karate studio where he worked, private residences, and at his home. United States Attorney Wigginton noted, "Horton demonstrated brazen arrogance in his commission of the sexual abuse of these children, committing his acts while other adults were in the same building and often just on the other side of a closed door." Two electronic entries, located in the "Notes" folder of Horton's iPhone, found during the forensic examination, demonstrated the calculated and premeditated manner in which Horton targeted each of his victims. In the two entries, Horton meticulously scripted what he would say to his young victims to so-

licit them, groom them, and to keep them silent. In pronouncing the sentence, Chief United States District Judge David R. Herndon commented on the shocking and serious nature of the offenses committed by Horton: "Probably in my 15 years as a federal judge this is the most serious and heinous case that I have seen. The dangerousness and deviousness of the defendant's acts are off the charts." The case was investigated by the Madison County Sheriff's Department, the Federal Bureau of Investigation's Metro East Cyber Crimes and Analysis Task Force, the Highland, Illinois, Police Department, and the Belleville, Illinois, Police Department. Horton is also charged with several counts of predatory criminal sexual assault and aggravated criminal sexual abuse in

the circuit courts of Madison and St. Clair Counties. Those charges are still pending. The case was prosecuted by Assistant United States Attorney Ali Summers. I am Thompson Cole Director Inspection Unit United Nations Inspection Agent in JFK Airport New York. During our investigation, I discovered An abandoned ship-ment through a Diplomat from United Kingdom under iship forwarder which was transferred to our facility here in JF Kennedy Airport and when scanned it re-

vealed an undisclosed sum of money in a Metal Trunk Box weighing approximately 55kg each. The consignment was abandoned because the Content was not properly declared by the consignee as money rather it was declared as personal effect to avoid diversion by the Shipping Agent also the Diplomat inability to pay for Non Inspection Fees. The long-overdue lawsuit will seek a formal

apology, debt cancellation and other reparations in a 10-part plan. The Caribbean nations, represented by British human rights law firm Leigh Day, will also seek a "repatriation" plan for Rastafarians who want to move to Africa. Associated Press notes, "Repatriation to Africa has long been a central belief of Rastafari, a melding of Old Testament teachings and Pan-Africanism whose followers have long pushed for reparations." The United States Attorney's Office announced that KEVIN SCOTT NESSLAND, 41, of Bozeman, Montana, was sentenced to 84 months in prison followed by 15 years' supervised release during a federal court hearing in Missoula, on March 6, 2014, before U.S. District Judge Dana Christensen. Nessler was sentenced in connection with his November 2013 bench trial conviction on three counts of receipt of child pornography. In a trial brief filed by Assistant U.S. Attorney Cyndee Peterson, the government stated that defendant Kevin Scott Nessler was surreptitiously observing (through holes he made in the attic) and recording the adult females in the apartment next to his apartment in Bozeman, Montana. Nessler's residence was searched pursuant to a search warrant. Law enforcement seized several items, including electronic devices. When the crimes (state charges)

were first detected, Nessler immediately left the Bozeman area. This occurred prior to the search of his residence. When he left Bozeman, Nessler took some of his computers and equipment. Nessler called the Bozeman Police Department from the road, and multiple telephonic conversations with Bozeman Police were recorded. During the telephonic conversations, Nessler stated that he has sex addiction issues and was seeking treatment. Nessler was subsequently located in Idaho after law enforcement officers responded to his vehicle during Nessler's suicide attempt. At that time, he was arrested on a warrant for the state charges and returned to Montana. Electronic items found in his vehicle were seized and transferred to the Bozeman Police Department in Montana. When detectives were searching one of Nessler's external hard drives for evidence of the burglary and surreptitious observation crimes, the detective found images of child pornography. Detectives obtained a second search warrant and submitted the computers and electronic devices to the Montana DCI

Computer Crime Lab for forensic examination. This included the devices seized from Nessler's residence and vehicle. Numerous items were forensically examined. A DCI Computer Examiner found evidence which tied the computers to certain of the drives. The examiner located more than 1,700 files which depicted child pornography. The case was investigated by the Bozeman Police Department, the Montana Department of Criminal Investigations, and the Federal Bureau of Investigation. A new progressive populist movement is rising up in the United States. Inspired by an expansive vision of greater economic opportunity for all Americans, this new movement is also fueled by

anger over politicians' broken promises. After decades of recurring economic crisis, which now seems systemic and permanent, millions of Americans have come to realize that much of our democratic system is

now owned by a moneyed elite that use their power to resist real change and to manipulate the economy for their own financial gain. Change can

be challenging, but it also presents opportunities for introspection and revitalization. Over the past few months we have spent time looking at the work we do and coming up with more efficient ways to do it. We want to ensure that we are making the most of the resources we have to best serve the field. Similarly to many of the organizations we work with, it's important to occasionally rethink operations.

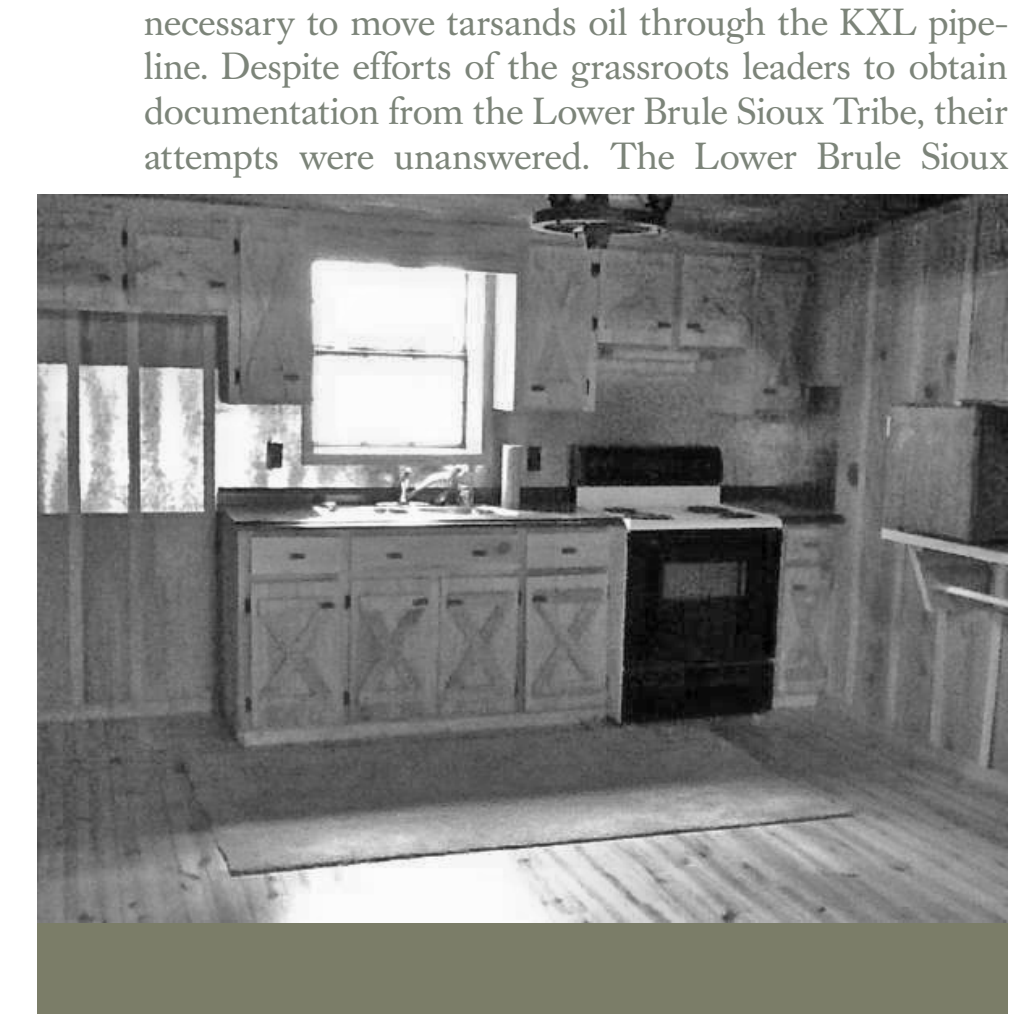

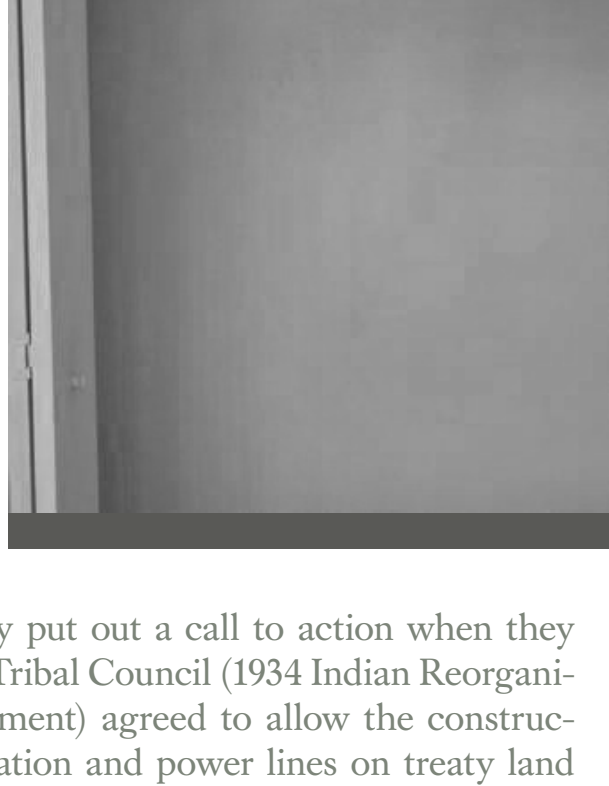

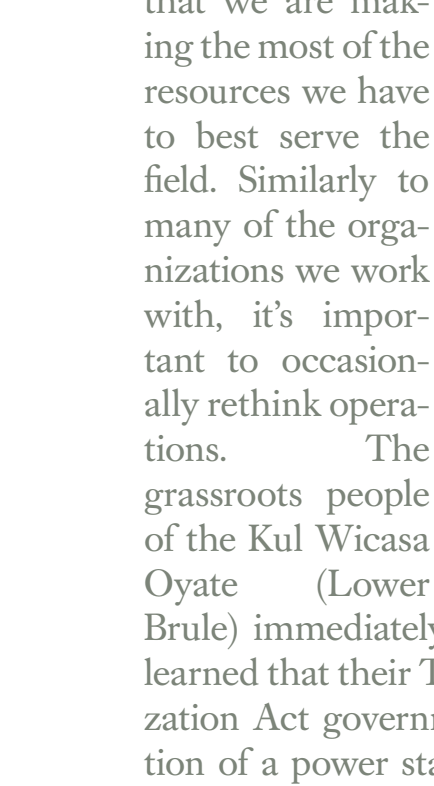

The grassroots people of the Kul Wicasa Oyate (Lower Brule) immediately put out a call to action when they learned that their Tribal Council (1934 Indian Reorganization Act government) agreed to allow the construction of a power station and power lines on treaty land necessary to move tarsands oil through the KXL pipeline. Despite efforts of the grassroots leaders to obtain documentation from the Lower Brule Sioux Tribe, their attempts were unanswered. The Lower Brule Sioux

tribal council is comprised of six people including President Michael Jandreau, who has served in tribal government since 1973, with the most recent decades in the office of the President. Inquiries to the Council by several tribal members resulted first in denial, then in confirmation (without documentation) and finally an admission that the "carrot" to the Tribal Council is the construction of wind turbines and free electricity for tribal members. What if you could receive a guaranteed basic yearly income with no strings attached? Didn't matter how much money you made now, or in the future. Nobody would ask about your job status or how many kids you have. The check would arrive in the mailbox, no matter what. All over the world, people are talking guaranteeing basic incomes for citizens as a viable policy.

Half of all Canadians want it. The Swiss have had a referendum on it. The American media is all over it: The New York Times' Annie Lowrey considered basic income as an answer to an economy that leaves too many people behind, while Matt Bruenig and Elizabeth Stoker of the Atlantic wrote about it as a way to reduce poverty. ATLANTIC SECURITY AGENCY (NSA) With a budget request of \$10.8 billion, the NSA is the second-largest agency in the U.S. intelligence community. It is headquartered in Fort Meade, Maryland. Ronald Davis Pope, age 49, of Mechanicsville, Maryland, pleaded guilty today to production of child pornography.

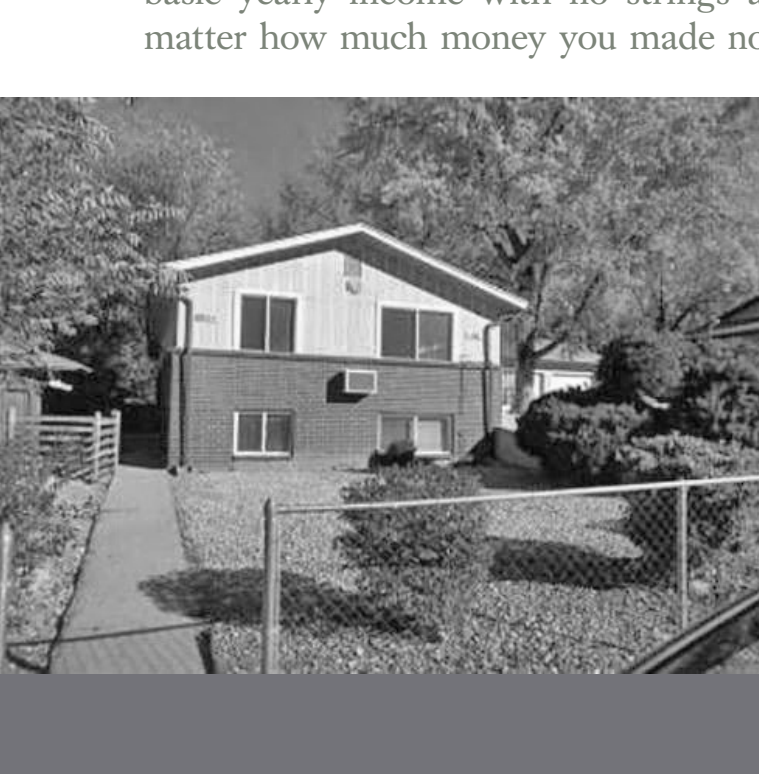

The guilty plea was announced by United States Attorney for the District of Maryland Rod J. Rosenstein, Special Agent in Charge Stephen E. Vogt of the Federal Bureau of Investigation, St. Mary's County Sheriff Tim Cameron, and St. Mary's County State's Attorney Richard Fritz. According to Pope's plea agreement, from February through May 2013, Pope lived with a family and shared a bathroom with the victim, a 14-year-old male. Pope placed a watch containing a hidden camera in the bathroom and recorded the victim in the shower and using the bathroom. The camera was placed in a location that allowed Pope to capture videos focused on the victim's genital area. Pope then transferred the videos to his computer and cellular phone. The victim was not aware that he was being recorded. On May 2, 2013, federal and state law enforcement officials executed a search warrant at Pope's residence and seized electronic devices, including Pope's cellular phone and laptop computer. tribal council is comprised of six people including President Michael Jandreau, who has served in tribal government since 1973, with the most recent decades in the office of the President. Inquiries to the Council by several tribal members resulted first in denial, then in confirmation (without documentation) and finally an admission that the "carrot" to the Tribal Council is the construction of wind turbines and free electricity for tribal members. What if you could receive a guaranteed basic yearly income with no strings attached? Didn't matter how much money you made now, or in the future. Nobody would ask about your job status or how many kids you have. The check would arrive in the mailbox, no matter what. All over the world, people are talking guaranteeing basic incomes for citizens as a viable policy.

Half of all Canadians want it. The Swiss have had a referendum on it. The American media is all over it: The New York Times' Annie Lowrey considered basic income as an answer to an economy that leaves too many people behind, while Matt Bruenig and Elizabeth Stoker of the Atlantic wrote about it as a way to reduce poverty. ATLANTIC SECURITY AGENCY (NSA) With a budget request of \$10.8 billion, the NSA is the second-largest agency in the U.S. intelligence community. It is headquartered in Fort Meade, Maryland. Ronald Davis Pope, age 49, of Mechanicsville, Maryland, pleaded guilty today to production of child pornography.

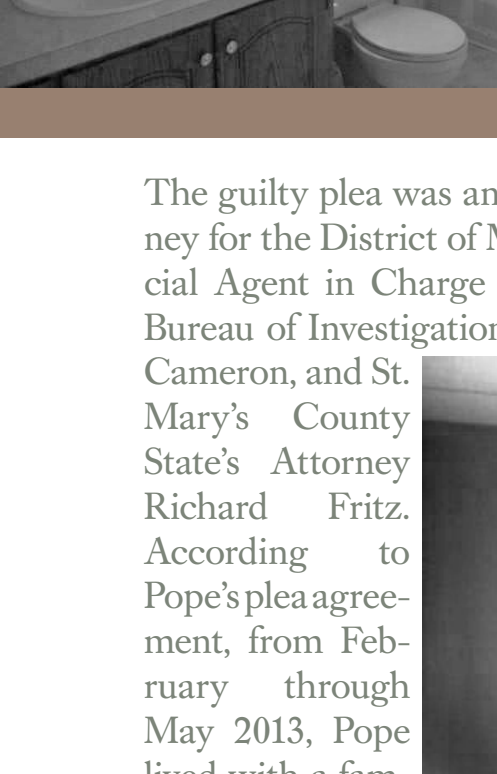

The guilty plea was announced by United States Attorney for the District of Maryland Rod J. Rosenstein, Special Agent in Charge Stephen E. Vogt of the Federal Bureau of Investigation, St. Mary's County Sheriff Tim Cameron, and St. Mary's County State's Attorney Richard Fritz. phone and the laptop recovered a total of 18 videos depicting the victim dressing, undressing, showering and using the restroom. The victim's penis is exposed in at least 12 of the videos. At least one of the five videos found on the laptop appears to be the same video recovered on the cellular phone. On May 7, 2013, a package addressed to Pope arrived at his residence. The package contained a weather clock hidden camera purchased on May 1, 2013, one day before Pope's arrest. Later that month, one of Pope's family members retrieved a package from a post office box belonging to Pope, which contained an HD clock DVR, USB cord, and a micro SD card. In June 2013, federal law enforcement officials seized the camera watch used to record the videos of

the victim. Subsequent forensic analysis of the watch camera memory revealed three videos, one of which depicts the victim showering. The spy camera watch also contained an image of Pope's face. As part of his plea agreement, Pope must register as a sex offender in the place where he resides, where he is an employee, and where he is a student, under the Sex Offender Registration and Notification Act (SORNA). Pope and the government have agreed that if the court accepts the plea agreement, Pope will be sentenced to 235 months in prison followed by a lifetime of supervised release. Chief U.S. District Judge Deborah K. Chasanow has scheduled sentencing for June 3, 2014 at 9:00 a.m. Pope's federal sentence will run concurrent to the sentence imposed in a case pending the St. Mary's County Circuit Court involving a separate victim. In that case, Pope has agreed to plead guilty to sexual abuse of a minor and be sentenced to 25 years in prison with all but 20 years suspended. Singleton's is a mish-mash of unpainted lumber and plywood that defines its shabby appearance. It has a big dining room, outside dining deck and a museum annex that features more than 100 ship models made by the original owner. The waitresses have been around for awhile and all know my name: hon, sweetheart, darling...how did they know? Their greetings underscore the southern nature of the food and service. All meals are served with great hushpuppies, and the vegetable of the day is quite often collard greens. Clams and clam chowder are always on the menu, and one of their specialties is Minorcan Clam Chowder. Minorcans were among the earliest settlers of St. Augustine and Mayport. When you visit, don't forget to try their blackened gator tail appetizer. It's definitely the best way to prepare and cook this reptile. Other fresh offerings include shrimp, crawfish, crablegs, scallops, oysters, crab legs and clam strips. You get to see all of the fresh fish in a display counter, and you know that most of them came in from the fishing boats tied off behind the restaurant. You can watch the cooks prepare your food right behind the fresh fish counter. The restaurant has a full bar, so you can enjoy your favorite adult beverage while you gorge on fresh seafood. Tammy Dickinson, United States Attorney for the Western District of Missouri, announced that a Kansas City, Missouri man was convicted in federal court today on charges related to child pornography. Donald T. Paris, Jr., 27, of Kansas City, was found guilty of one count of producing child pornography, one count of receiving child pornography over the Internet, one count of transporting child pornography over the Internet, and one count of possessing child pornography. Evidence introduced during the trial indicated that Paris used a child victim, identified in the indictment as "CV," to produce child pornography in December 2010. Paris also used his e-mail account to receive, transport, and possess separate images of child pornography in December 2010 and December 2011. Following the presentation of evidence, the jury in the U.S. District Court in Kansas City, Missouri deliberated for approximately 30 minutes before returning the guilty verdicts to U.S. District Judge Beth Phillips, ending a trial that began Monday, March 24, 2014. Under federal statutes, Paris is subject to a mandatory minimum sentence of 15 years in federal prison without parole, up to a sentence of 80 years in federal prison without parole. A sentencing hearing will be scheduled after the completion of a presentence investigation by the United States Probation Office. This case is being prosecuted by Assistant U.S. Attorney Patrick D. Daly. It was investigated by the FBI; the Kansas City, Missouri Police Department; the Taney County, Missouri Sheriff's Department; the North Richland Hills, Texas, Police Department; and the Branson, Missouri Police Department. Friend, Good day and compliments, I know this letter will definitely come to you as a surprise, but I implore you to take the time to go through it carefully as the decision you make will go off a long way to determine my future and continued existence. Please allow me to introduce myself. I am CAPTAIN GREG, in 4th Battalion, 64th Armored Regiment unit here that Patrols the helmand province, Afghanistan. I am desperately in need of assistance and I have summoned up courage to contact you. I am presently in Afghanistan and I seek your contact particulars in an address journal. I am finding your assistance to evacuate the sum of \$25m (Twenty five Million United States Dollars) to you, as far as I can be assured that it will be safe in your care until I complete my service here. This is no stolen money and there are no dangers involved. SOURCE OF MONEY: Some money in US DOLLARS was discovered and concealed in barrels at a location in helman province when we conducted a foot patrol and it was agreed by all party present that the money be shared amongst us. This might appear as an illegal thing to do but I tell you what? No compensation can make up for the risks we have taken with our lives in this hellhole. The above figure was given to me as my share and to conceal this kind of money became a problem for me, so with the help of a Canadian contact working with the UN here (his office enjoys some immunity) I was able to get the package out to a safe location entirely out of trouble spot. He does not know the real contents of the package as he believes that it belongs to an American who died in an air raid, who before giving up entirely out of trouble spot. He does not know the real contents of the package as he believes that it belongs to an American who died in an air raid, who before giving up trusted me to hand over the package to his close relative. I have now found a secured way of getting the package out of Afghanistan for you to pick up. I do not know how long I will remain here, as I have been lucky to survive 2 suicide bomb attacks by Pure Divine intervention. This and other reasons put into consideration have prompted me to reach out for help. If it might be of interest to you then Endeavor to contact me immediately and we would work out the necessary formalities but I pray that you are discreet about this mutually benefiting relationship. Respectfully, Capt Greg Schneider. United States Soldier: Afghanistan United States Attorney A. Lee Bentley, III announces that Scott Anthony Estes (19, of New Berlin, Illinois) was sentenced to 40 years in federal prison for distributing child pornography. He was also ordered to serve a life term of supervision following his incarceration. Estes pleaded guilty in November 2013. According to the plea agreement, Estes began contact with a 10-year-old boy on Xbox Live. Estes attempted to convince the child to engage in a sexual relationship. The child told his father about the conversation, and the father contacted law enforcement. Acting in an undercover capacity, agents initiated an investigation and continued communication with Estes. Believing that he was still talking to the child, Estes sent videos depicting child pornography and images of his genitalia. Estes was arrested by law enforcement on March 22, 2013. During an interview, he stated that he had met the child while playing a video game played on Xbox. Estes also admitted to sending a picture of his genitalia to the child, as well as child pornography videos. He

Respectfully, Capt Greg Schneider. United States Soldier: Afghanistan United States Attorney A. Lee Bentley, III announces that Scott Anthony Estes (19, of New Berlin, Illinois) was sentenced to 40 years in federal prison for distributing child pornography. He was also ordered to serve a life term of supervision following his incarceration. Estes pleaded guilty in November 2013. According to the plea agreement, Estes began contact with a 10-year-old boy on Xbox Live. Estes attempted to convince the child to engage in a sexual relationship. The child told his father about the conversation, and the father contacted law enforcement. Acting in an undercover capacity, agents initiated an investigation and continued communication with Estes. Believing that he was still talking to the child, Estes sent videos depicting child pornography and images of his genitalia. Estes was arrested by law enforcement on March 22, 2013. During an interview, he stated that he had met the child while playing a video game played on Xbox. Estes also admitted to sending a picture of his genitalia to the child, as well as child pornography videos. He

Friend, Good day and compliments, I know this letter will definitely come to you as a surprise, but I implore you to take the time to go through it carefully as the decision you make will go off a long way to determine my future and continued existence. Please allow me to introduce myself. I am CAPTAIN GREG, in 4th Battalion, 64th Armored Regiment unit here that Patrols the helmand province, Afghanistan. I am desperately in need of assistance and I have summoned up courage to contact you. I am presently in Afghanistan and I seek your contact particulars in an address journal. I am finding your assistance to evacuate the sum of \$25m (Twenty five Million United States Dollars) to you, as far as I can be assured that it will be safe in your care until I complete my service here. This is no stolen money and there are no dangers involved. SOURCE OF MONEY: Some money in US DOLLARS was discovered and concealed in barrels at a location in helman province when we conducted a foot patrol and it was agreed by all party present that the money be shared amongst us. This might appear as an illegal thing to do but I tell you what? No compensation can make up for the risks we have taken with our lives in this hellhole. The above figure was given to me as my share and to conceal this kind of money became a problem for me, so with the help of a Canadian contact working with the UN here (his office enjoys some immunity) I was able to get the package out to a safe location entirely out of trouble spot. He does not know the real contents of the package as he believes that it belongs to an American who died in an air raid, who before giving up entirely out of trouble spot. He does not know the real contents of the package as he believes that it belongs to an American who died in an air raid, who before giving up trusted me to hand over the package to his close relative. I have now found a secured way of getting the package out of Afghanistan for you to pick up. I do not know how long I will remain here, as I have been lucky to survive 2 suicide bomb attacks by Pure Divine intervention. stated that he had asked the child to send naked pictures of himself. Estes also said that he had been in communication with a 13-year-old boy in Texas and that he had met that child while playing Xbox as well. Following Estes' arrest, a search warrant was conducted on his e-mail address. An examination of his e-mail account showed that he distributed child pornography to numerous persons between July 2012 and March 2013. Among the images and videos of child pornography distributed, several included pornographic videos that Estes had produced himself, while sexually abusing at

least two children. A forensic review of Estes' cell phone showed that he possessed more than 1,200 images of child pornography, including images depicting infants being sexually abused. A majority of the images of child pornography depict children between the ages of 3 and 8. This case was investigated by Federal Bureau of Investigation. It was prosecuted by Assistant United States Attorney Christopher LaForgia. Germany has confirmed its biggest Data theft in the country's history with usernames and passwords of

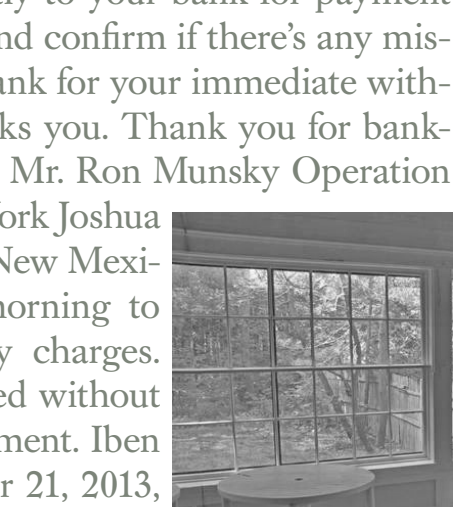

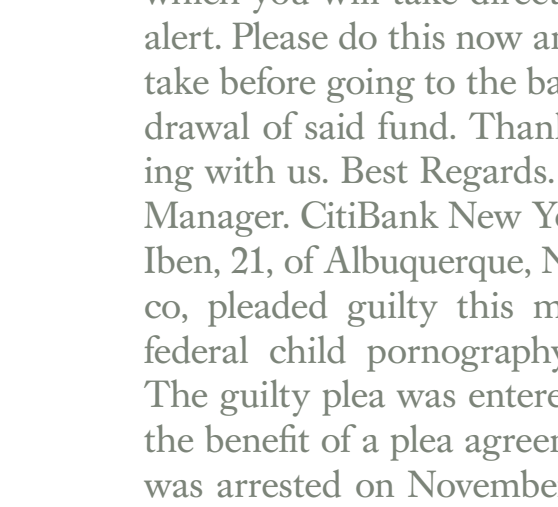

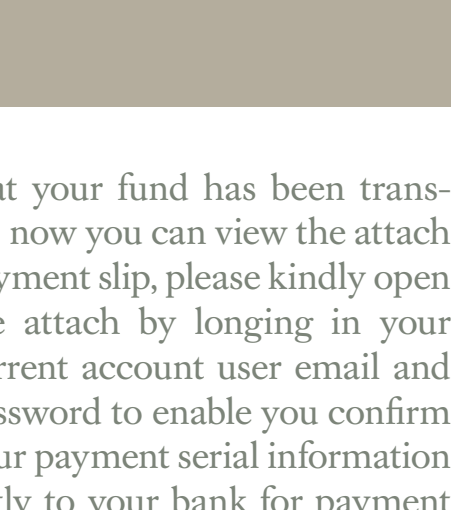

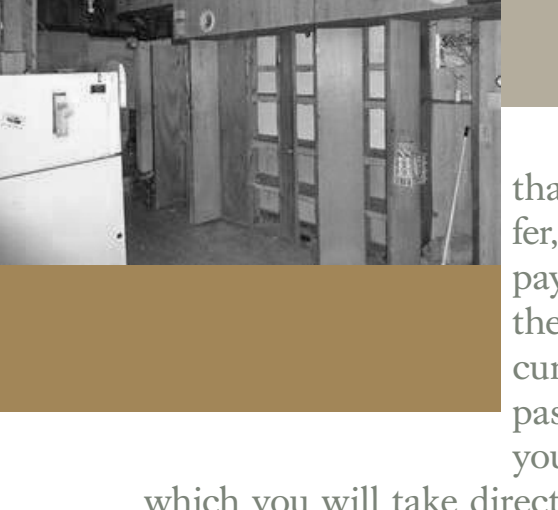

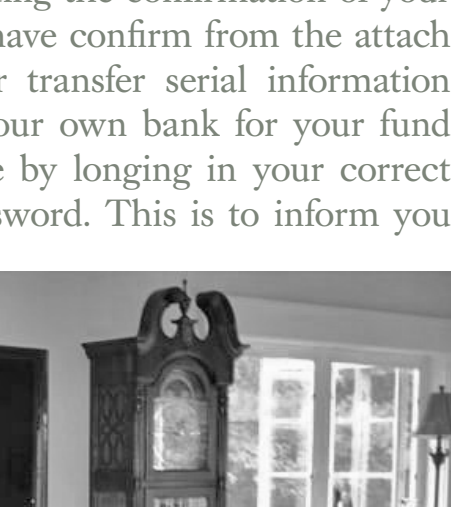

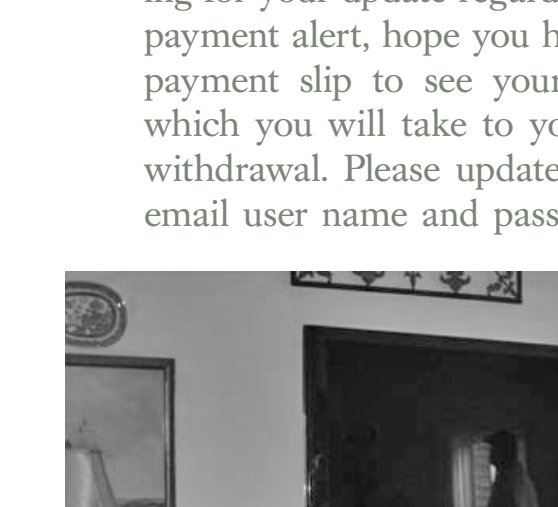

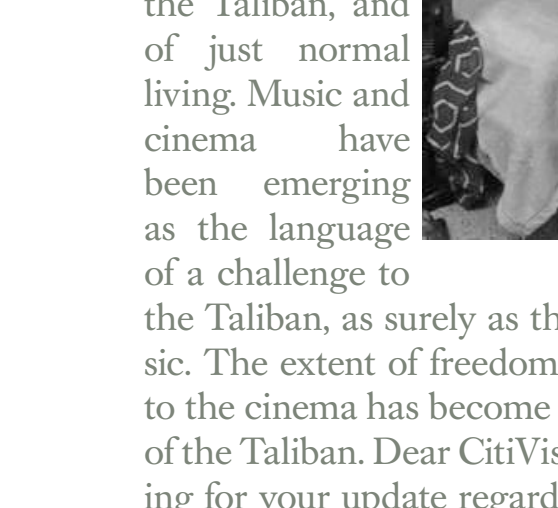

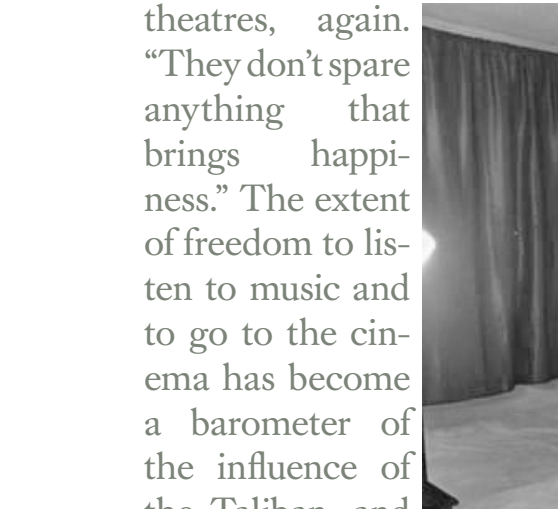

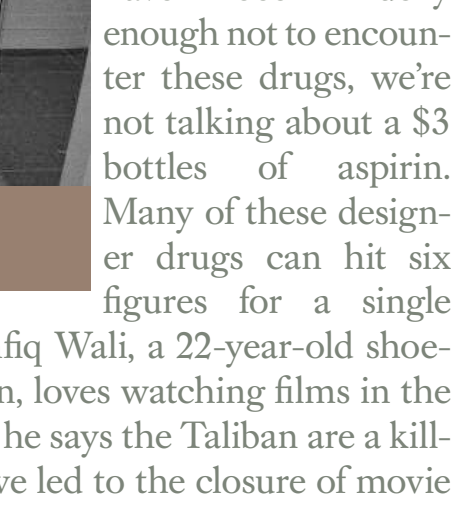

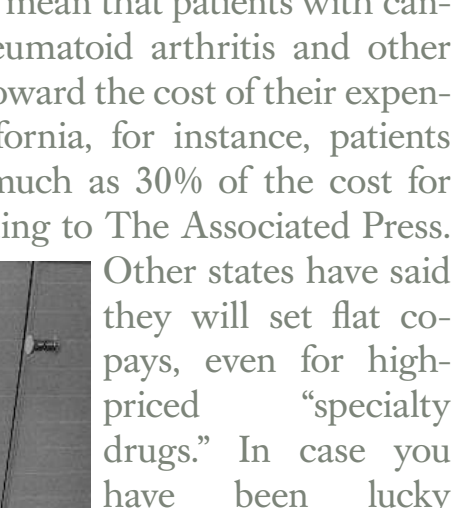

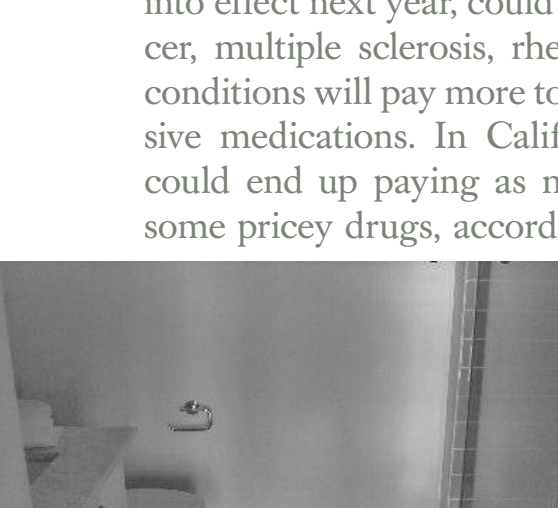

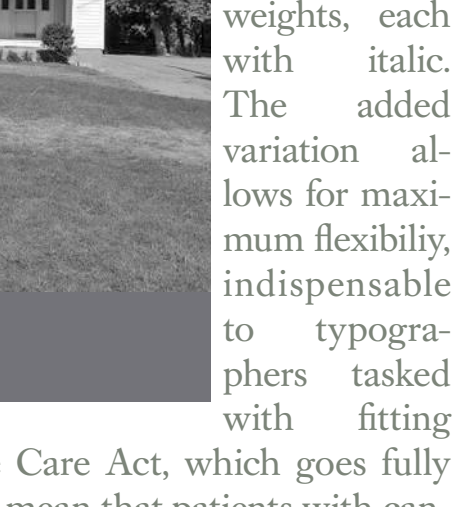

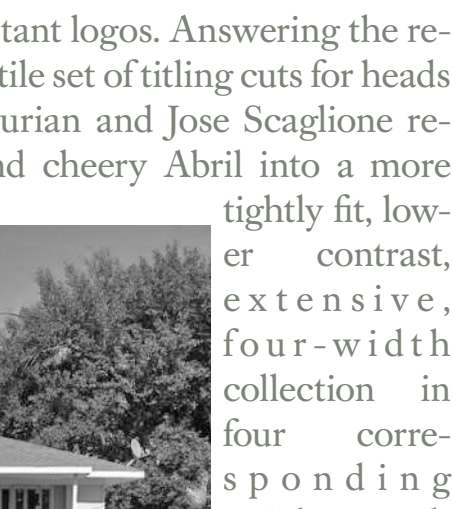

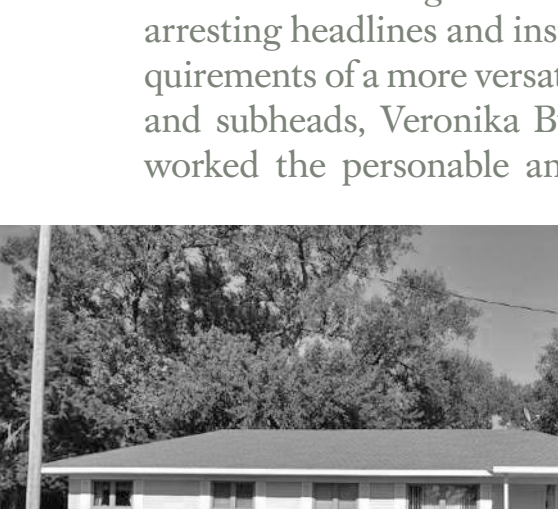

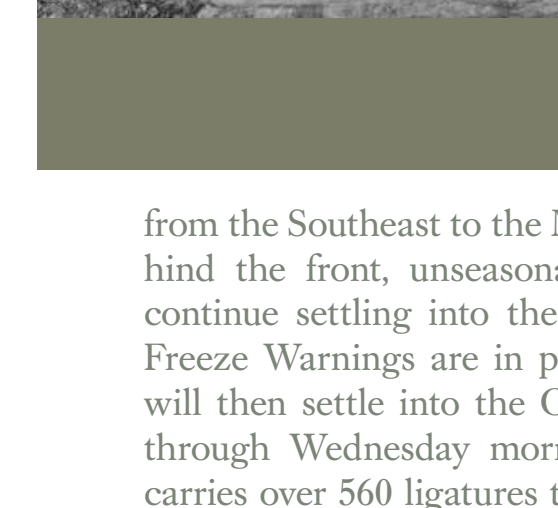

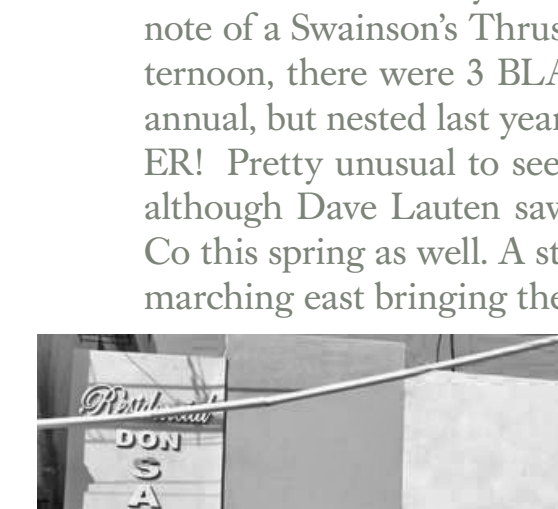

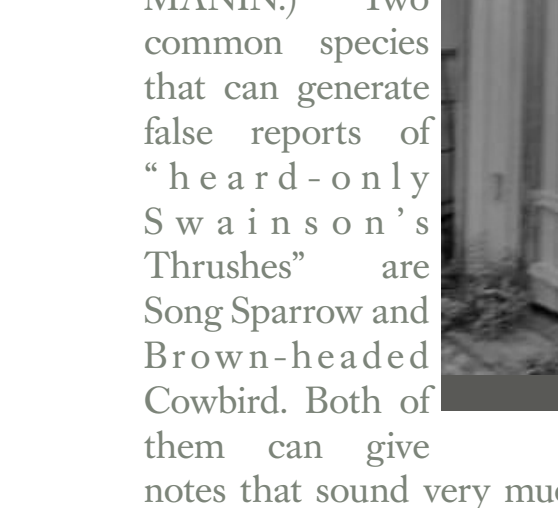

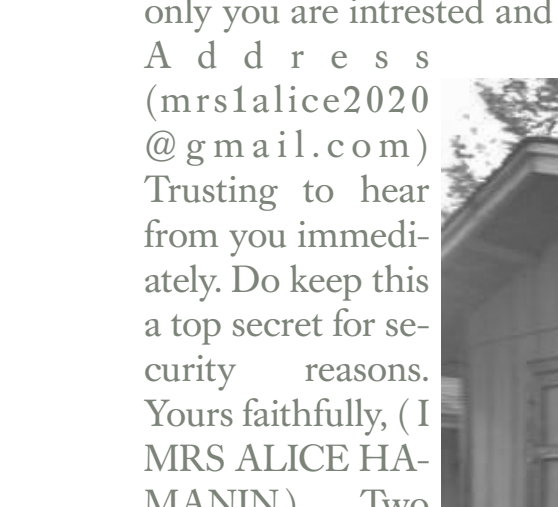

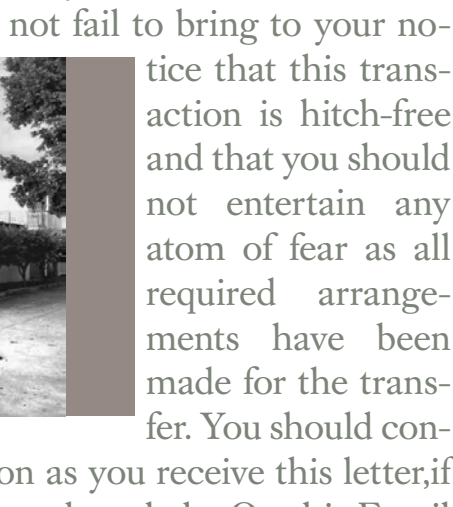

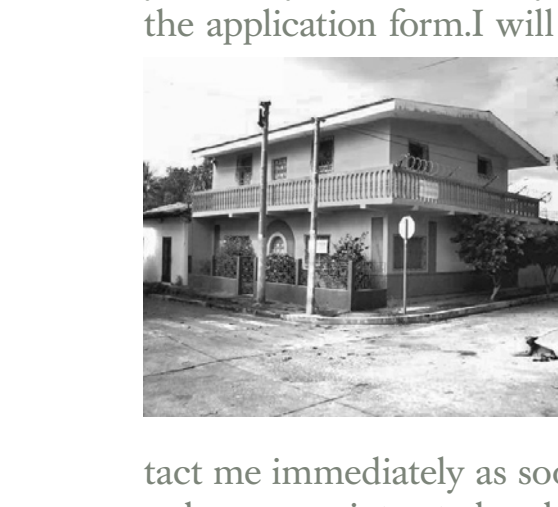

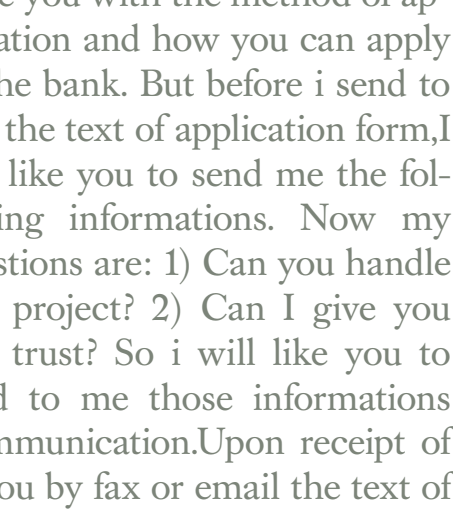

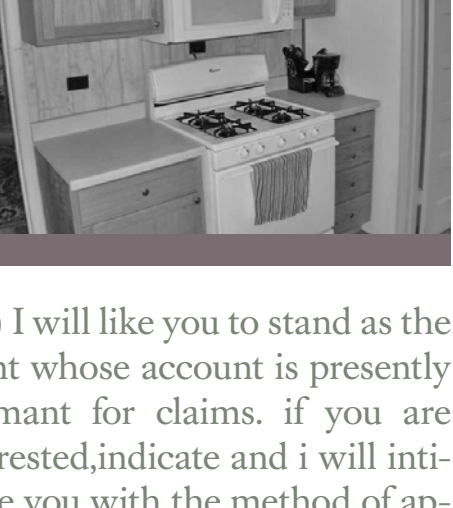

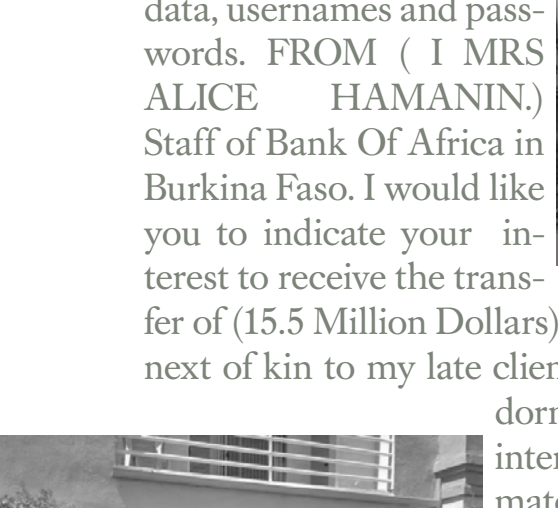

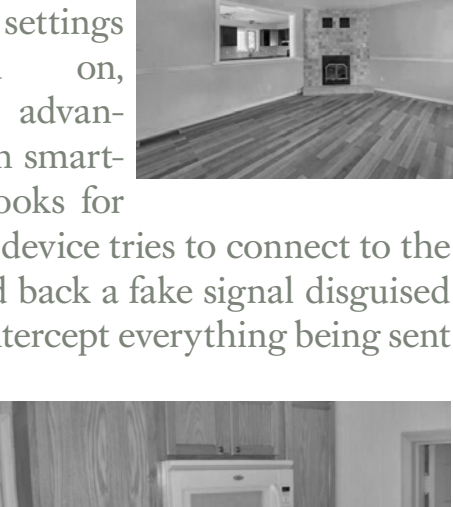

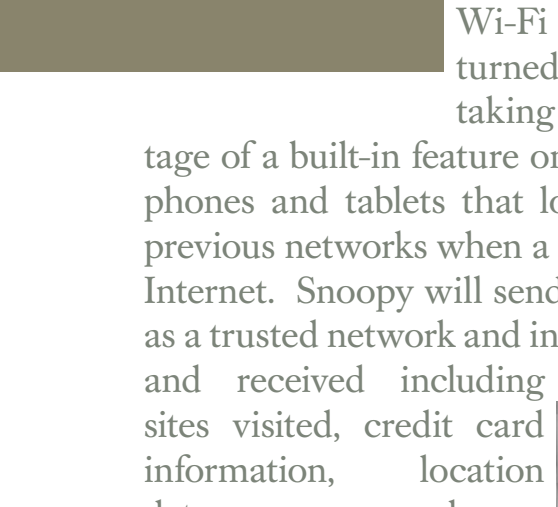

some 18 million email accounts stolen and compromised by hackers. The Story broke by the German press, Der Spiegel on Thursday, when German Authorities revealed another mass hacking of private data belonged to German citizens and major Internet companies both in Germany and abroad. In 2003 the World Bank published the first Doing Business Report, which ranks the world's countries based on the "ease of doing business" in them. For the most part, the fewer regulations a country has, the higher they score. The report has become the Bank's most influential publication, and the ranking system is recognised as a powerful tool for compelling countries to initiate regulatory reforms, driving a quarter of the 2,100 policy changes recorded since it was launched. Investors and CEOs use the rankings to decide where to move their money or headquarter their businesses for maximum profit. There's even a handy iPhone app that jet-setting capitalists can use to redirect their investments on the fly.

began in July 2013 and revealed that an IP address subscribed to Iben's residential address was being used to share child pornography images. According to the criminal complaint, on November 20, 2013, FBI agents executed a federal search warrant at Iben's residence and seized computers and computer-related media. While the search warrant was being executed, Iben participated in a voluntary, recorded interview during which he admitted began sharing child pornography images

years ago and last received or sent such images by e-mail the week before. A subsequent forensic examination of a laptop computer taken from Iben's residence revealed that it contains images consistent with child pornography. On December 17, 2013, Iben was indicted and charged with two counts of receipt of child pornography; two counts of distribution of child pornography; and one count of possession of child pornography. The indictment alleged that Iben received child pornography on two occasions on April 29, 2013, and distributed child pornography on two occasions on September 20, 2013. It also alleged that Iben possessed child pornography on November 20, 2013, and that Iben committed all

five offenses in Bernalillo County, New Mexico. Today Iben entered guilty pleas to all five counts of the indictment. Iben has been in federal custody since his arrest and remains detained pending his sentencing hearing, which has yet to be scheduled. At sentencing, Iben faces a federal prison term of not less than five years and not more than 20 years. Iben also will be required to register as a sex offender. From 2006 to 2008, Duran took out 68 commercial and personal loans from 39 banks in Spain. He farmed the money out to social activists, funding speaking tours against capitalism and TV cameras for a media network. "I saw that on one side, these social movements were building alternatives but that they lacked resources and communication capacities," he said. "Meanwhile, our reliance on perpetual growth was creating a system that created money out of nothing." They call him the Robin Hood of the banks, a man who took out dozens of loans worth almost half a million euros with no intention of ever paying them back. Instead, Enric Duran farmed the money out to projects that created

and promoted alternatives to capitalism. After 14 months in hiding, Duran is unapologetic even though his activities could land him in jail. "I'm proud of this action," he said in an interview by Skype from an undisclosed location. The money, he said, had created opportunities. "It generated a movement that allowed us to push forward with the construction of alternatives. And it allowed us to build a powerful network that groups together these initiatives." in a statement ahead of the action. “These numbers continue to grow as the current deportation crisis tears apart 1,100 more families each day.” As one speaker explained during the protest, the Obama administration’s strategy has been: “Deport the man, the family will follow.”

Francisco de Goya witnessed first hand the French occupation of Spain in 1808, when Napoleon used the pretext of reinforcing his army in Portugal to seize the Spanish throne, leaving his brother Joseph in power. Attempts to remove members of the Spanish royal family from Madrid provoked a widespread rebellion. This popular uprising occurred between the second and third of May 1808, when suppressed by forces under Marchal Joachim Murat. Walker announced that in federal court today Senior United States District Judge Malcolm J. Howard sentenced Wallace Edwin Perry, Jr., 28, of Raleigh, North Carolina, to 188 months’ imprisonment, followed by 15 years of supervised release. A criminal information was filed on December 9, 2013, charging receipt of child pornography, in violation of Title 18, United States Code, Section 2252(a)(2). On February 10, 2014, Perry pled guilty to the charge. According to the investigation, in February, 2012, Cary Police Department initiated an investigation related to the peer-to-peer sharing of child pornography. From February 2012 to August 2012, an

undercover agent identified a computer offering to share files containing child pornography. A search warrant was obtained and executed in September 2012. Computer forensics revealed over 20,000 images of child pornography. The criminal investigation of this case was conducted by the Cary Police, the Raleigh Police Department, and the Federal Bureau of Investigation. Assistant United States Attorney Ethan A. Ontjes is handling the prosecution on behalf of the Eastern District of North Carolina. Greetings from the Farm Stand! We’ve been wading through seedlings the past couple weeks, enjoying the sunshine, wind, and rain; sometimes, all in the same half hour. The farmers have been busy, and just cut some pristine heads of red lettuce out of the field. Peonies are opening, strawberries are starting to turn red in the sun, and the blueberries are plumping up as well. There are giant leeks and wonderful leek scapes at the stand, and our friends at Kenagy Family Farm in Albany brought us some asparagus to sell this week. Three cheers for spring! We’re also getting hungry staring at all the promising seedlings hanging out at the Farm Stand. Many thanks to all of you who have stopped by to say hello and start your gardens with our seedlings. I love vegetal discussions, so if you have questions, comments, or old family recipes, feel free to come visit me at the Farm Stand. The stand will have seedlings until early June. Expect more and more produce every week as we head into the growing season, and check the updated list (left) in this newsletter, as well as on our website. And if thy brother, a Hebrew man, or a Hebrew woman, be sold unto thee, and serve thee six years; then in the seventh year thou shalt let him go free from thee. And when thou sendest him out free from thee, thou shalt not let him go away empty: thou shalt furnish him liberally out of thy flock, and out of thy floor, and out of thy winepress: of that where-with the LORD thy God hath blessed thee thou shalt give unto him. And thou shalt remember that thou wast a bondman in the land of Egypt, and the LORD thy God redeemed thee: therefore I command thee this thing today. Paul Scrom, age 63, of Albany, New York, pled guilty today in Albany before Senior United States District Judge Thomas J. McAvoy to one count of distribution of child pornography, announced United States Attorney Richard S. Hartunian and Andrew W. Vale, Special Agent in Charge of the Albany Division of the Federal Bureau of Investigation. Scrom faces a statutory mandatory minimum sentence of five years and a maximum sentence of 20 years, as well as a lifetime term of supervised release, a maximum fine of \$250,000, and mandatory registration as a sex offender. Scrom will be sentenced in Albany, New York, on October 14, 2014. As part of his guilty plea, Scrom admitted that he distributed images and movies of child pornography through a peer-to-peer file sharing program. On September 12, 2013, investigators searched Scrom’s residence and recovered numerous images and videos depicting child pornography. This case was investigated by the Federal Bureau of Investigation-Albany Division and is being prosecuted by Assistant United States Attorney Wayne A. Myers. Ontjes is handling the prosecution on behalf of the Eastern District of North Carolina. Greetings from the Farm Stand! We’ve been wading through seedlings the past couple weeks, enjoying the sunshine, wind, and rain; sometimes, all in the same half hour. The farmers have been busy, and just cut some pristine heads of red lettuce out of the field. Peonies are opening, strawberries are starting to turn red in the sun, and the blueberries are plumping up as well. There are giant leeks and wonderful leek scapes at the stand, and our friends at Kenagy Family Farm in Albany brought us some asparagus to sell this week. Three cheers for spring! We’re also getting hungry staring at all the promising seedlings hanging out at the Farm Stand. Many thanks to all of you who have stopped by to say hello and start your gardens with our seedlings. I love vegetal discussions, so if you have questions, comments, or old family recipes, feel free to come visit me at the Farm Stand. The stand will have seedlings until early June. Expect more and more produce every week as we head into the growing season, and check the updated list (left) in this newsletter, as well as on our website. We also have gorgeous flowers and arrangements, locally sourced and brought to us by Flower Kuan. Susan was founded in the early 8th Century, Tempyo 11. Now it is a Soto sect zen temple. Originally it belonged to the Hosso sect, one of the 6 original sects based in Nara. It was the family temple for one of the retainers of the Amago clan who ruled the area before being ousted by the Mori. It is not known how old the wonderful ceiling painting of a dragon is, but it is a Florida couple who retired from their management jobs to care for the poor vowed Monday to wage a tenacious legal fight days after being fined more than \$300 each for violating a local law. Debbie and Chico Jimenez openly admit committing the act that earned them two citations apiece: feeding more than 100 people who are homeless in Daytona Beach. Police in Daytona Beach also threatened them with arrest and incarceration, if

undercover agent identified a computer offering to share files containing child pornography. A search warrant was obtained and executed in September 2012. It’s just heart-breaking. I have cried and cried and cried,” said Debbie Jimenez, 52, a retired auto parts store manager. She and her husband, 60, a retired construction manager, operate New Smyrna Beach-based ministry called “Spreading the Word Without Saying a Word.” “One of our (homeless) friends said that Wednesday is just not going to be Wednesday anymore,” Debbie Jimenez added. “We were given 10 days to either pay the fine or tell them we’re going

to court. We’re going to court. The police don’t like it. But how can we turn our backs on the hungry? We can’t. The artists working in New York State today in the realm of food and farming coincide with a larger cultural awakening regarding the ills of our present system, such as the distances food travels to supermarket shelves and the effects of shipping and transport on climate change. Brooklyn has become the epicenter for food activism and culinary explorations. Artists have joined food activists in focusing on environmental problems such as lack of biodiversity in monocultural farms, the loss of top soil and nutrient-poor soil, the abuse and poor conditions of feedlot and factory raised animals, the conversion of farmland into housing, and the waste of un-harvested crops. Artists are now farming not only to raise their own food in order to become self-reliant and to eat more healthily, but also to offer alternative and sustainable approaches within their local communities. Dear Sir or Madam, How are you today and hope you are well. We have a classic Beach Sling Backpack, it is our BEST SELL item. Once you have the detailed advertising information in your stride, your business can immensely optimize its potential and reach out to thousands of prospects. Our detailed list collection encompasses volumes of information from our business mailing lists that feature an abundance of details. We understand the essence of a strong advertising channel to your future success. Our customer service staff is standing by for your list inquiries! Entire healthcare facilities may soon be dubbed "no handshaking zones." As "smoke free zones" become more accepted today, so too could "no human contact zones."Touching is now being proven to be more dangerous than smoking, as deadly super bugs like the MERS virus spread.Hospitals may begin prohibiting human touch, in fear of spreading disease-New research from the UCLA reveals that the danger of spreading disease through hand to hand contact is growing rapidly, especially in an age of runaway super-bugs. One day, hospital lobbies may display signs with an X

through a picture of a handshake, prohibiting visitors and health care professionals from making simple contact with one another. One day, visitors may be asked to leave the building for hugging one another. In Nigeria, university lecturers have been on strike for nearly 6 months; medical doctors are contemplating going on strike; the roads are death traps; people rely on generators for power as electricity supply is epileptic ; people have to sink wells or boreholes to supply their own homes with water; those who can't have to buy water off the street from water vendors; Nigeria remains one of only three countries in the world where polio is endemic, the other two being Pakistan and Afghanistan; our hospitals are poorly resourced and people with money fly abroad for routine health checks; we have one of the highest infant and maternal mortality rates in the world; many state governments have refused to adopt the Child Rights Act, and those which have, are failing to enforce it; child marriages occur with reckless impunity and no one appears interested in banning the practice anytime soon; you get 7 years for raping a woman but 14 years for a consensual same-sex intercourse; we rely

on foreign aid to assist with poverty alleviation despite our stupendous wealth; our government is one of the most corrupt in the world etc. Visit Terra Cotta Warriors which rank among the world's top archaeological finds and the eighth miracles in the world. This incredible collection of well over 6,000 figures was accidentally unearthed by a group of peasants trying to dig a well in 1974. Instead of water, they found a 2,000-year-old statue of a warrior made to protect the tomb of the Emperor Qin Shi Huang, the founder of the Qin Dynasty and the first man to rule over a unified China. Fast-forward thirty-some years and the emperor's underground army has become an enormously popular tourist destination, even as archaeologists continue to painstakingly excavate and preserve the fragile statues. Huaqing Chi hot springs situated at the foot of Lishan (Mount Li) have been in use for around 2,500 years; the mineral-rich waters bubbling up from the earth have soothed emperors dating back to the notorious Qin Shihuang, and during the Tang Dynasty they became a primary imperial summer residence. The lake offers year-round pleasure. Many prefer when it is a green and lively world. The

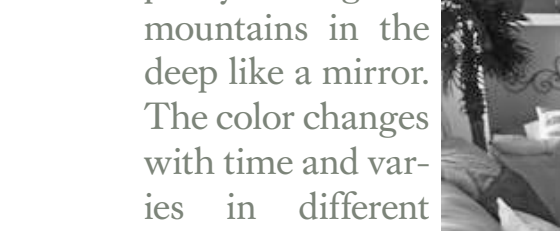

mountains and grassland wear a green blanket with herds of cattle and sheep dispersed over the grassland. The bank is connected with stretching farmlands, which is prospering with blooming rape flowers and rolling with wheat waves, sending blasts of fragrance to the lake. The water of the lake is also very limpid, which reflects the pretty green mountains in the deep like a mirror. The color changes with time and varies in different depth of the lake, which produces a sense of mystery, hence the name 'Seven-Colored Lake'. As a result of the teeming fish on the lake, the mouth of the nearby river has a yellow color to it as the fish float close to the surface. Many birds are also attracted to this beautiful lake and bountiful surroundings, resulting in this place being a kingdom for birds' watchers. Apart from embracing the heavenly beauty here, you can either stroll on the grass or ride on a yak, climb the sand hill or visiting the historic remains left on the Tang-Tubo ancient road or the Silk Road. If you are more sociable, the hospitable local people will warm-

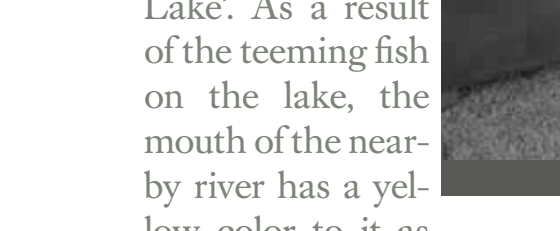

ly welcome you as you visit their homes and enjoy a taste of the Tibetan life. In addition, tents and various delicious foods are provided for the tourists in the pastures. Central to the vision of the conference is an inter-institutional, non-hierarchal, and accessible event that makes a particular effort to embrace emergent thought and the participation of emerging academics, fostering new avenues for critically-oriented scholarship and collaboration. The conference is divided into thematic streams, each coordinated by different researchers and with separate calls for papers, included in this document. We welcome paper proposals that respond to the particular streams below. In addition, papers may be proposed as part of a general stream, i.e. with no specific stream in mind. Spanning a range of broad themes, these streams provide the impetus for new points of dialogue. The issue of transparency in copyright policy has moved to the front of conversations around the world due to the controversy concerning the super-secret international negotiations of the Trans-Pacific Partnership trade agreement. Secret political negotiations are toxic for democracy, and the TPP threatens to export horrible, out-

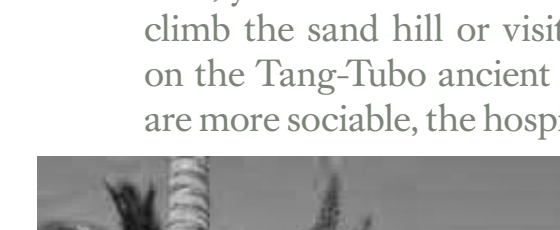

of-touch intellectual property policies across the globe, without any public debate. While the cold air gets reinforced across the central and eastern U.S. from a series of clippers, low pressure along a cold front further south will bring snow to portions of the ArkLaTex, and ice down to the upper Texas coast. Hard Freeze Warnings are also in effect from Louisiana to Florida. Thirty-one of the nation's most respected retired generals and admirals today sent a letter to President Obama urging him to make good on his executive order to close the U.S. detention facility at Guantanamo Bay. They also asked that he set the record straight on torture, a policy he also banned by executive order. Members of the coalition who signed today's letter stood behind the president on January 22, 2009 -- his second day in office -- when the orders were signed. Today's letter comes as Congress and the Obama

Administration have made progress toward putting Guantanamo on the path to closure. Progress toward closing Guantanamo continued this month as the Periodic Review Board (PRB), established by executive order in March 2011, concluded its first case. With regard to torture, the retired military leaders urged President Obama to direct his administration, particularly the CIA, to fully cooperate with the Senate intelligence committee to declassify and publicly release the 6000-plus page study that details the post-9/11 CIA rendition, detention, and interrogation program. Thanks Eric Yeboah Liz Nichols was pepper sprayed in the face Nov. 11, 2011 during an Occupy Portland protest. She unsuccessfully sued the city for excessive force. Liz Nichols is the Occupy Portland protester whose image became widely known for being blasted in the face with pepper spray by a Portland police officer in fall 2011. She sued the city for excessive force but lost after a four-day trial in August in U.S. District Court in Portland. She had sought \$30,000, noting the excruciating pain of pepper spray in her eyes and throat -- and the ensuing nightmares, depression and worsening eczema. But the jury sided with Portland, and so the city was entitled to recover its costs of defending itself. Deputy city attorney David Lundrum

said he offered to drop the city's pursuit of costs if Nichols agreed to waive an appeal to the Ninth Circuit Court of Appeals. He called one of Nichols' attorneys with the offer. Nichols, 23, is a college student at Portland State University. At the time of her federal trial, she also was working as a janitor. Nichols decided to appeal. So the city sought its payoff. On Oct. 18, federal judge Michael Mosman signed off on the \$7,116 that Nichols now owes. One in two college graduates are now either unemployed or underemployed. Millennials -- even those from the middle class -- are experiencing income inequality and America's failed dream of upward mobility first-hand. The mismatch of college-educated young workers with low-wage, unskilled, precarious jobs is creating a new face of the oncedwindling American labor movement: young, diverse, led by millennials in their twenties and thirties, and fighting what they see as an unfair labor market. Their modest cause? Pushing for a higher minimum wage. Because of too many young people interested looking for work, these millennials reason that the labor movement is the only way to address large-scale poverty and income inequality -- starting with their own.
